1. Situation update:

The number of people reported as having been directly affected by the floods has increased to above 17.2 million, with evacuations and major new flooding reported. The overall death toll has risen above 1,600, with more than 2,500 people now confirmed as injured. There has been a significant increase in the number of houses reported as damaged or destroyed. The figure now stands at 1.2 million.

Thousands of people fled on Friday from the southern Pakistani town of Thatta after the swollen Indus river burst its banks and authorities ordered an evacuation.

Fresh flooding has sent a million people fleeing from their homes in the south in the past 48 hours.

The death toll from the floods, triggered by unusually heavy monsoon downpours over the upper Indus basin a month ago, was expected to rise significantly as more bodies were found while many people were missing, a disaster authority spokeswoman said.

Floodwaters are beginning to recede across most of the country as the water flows downstream, but high tides in the Arabian Sea meant they still posed a threat to towns in Sindh province such as Thatta, 70 km (45 miles) east of Karachi.
