Closure of DOG 16 unauthorized crossing point **KFOR contributes to a Safe and Secure Environment** **16 JUN 2012**

This morning KFOR commenced an operation to physically close the unauthorized crossing point in the vicinity of BERNJAK. This operation is being conducted in order to contribute towards a safe and secure environment by preventing unauthorized movements across the Administrative Boundary Line.

Since 05:30am KFOR established several vehicle check points and secured a number of cordoned off areas for safety reasons. This activity is in support of operations related to the physical closure of the unauthorized crossing point. After the successful completion of the closure operation the vehicle check points will cease and the cordons around the secured areas will be lifted.

This unauthorized crossing point will shortly be impassable due to the physical barrier put in place by KFOR.

In the course of the operation, no incidents have been reported. This operation is fully in line with the framework of KFOR's mission.
