'This book incorporates research papers and discussions originally presented at a conference of leading scholars from the US, Russia, Europe and the Middle East who gathered to examine the region's political, economic, social and security evolution since 1989. As the papers illustrate, the West's image of Central Asia as a homogeneous belt of Islamic countries with uniform views of the region's future orientation is false. The papers also illustrate that hyperbolic prognoses of an 'Islamic implosion' threatening to embroil the region in violent insurrections, possibly spreading throughout the former Soviet

Union and the Middle East, are false as well. They have simply not materialized. Islam, in fact, has yet to emerge as a potent political force in Central Asia. This region is now lifting itself from economic obscurity and political isolation. Although distinct national identities are only in formative stages today, each of the five Central Asian states is likely to move in an individual direction, motivated by distinct national interests. The key issue is the extent of Russia's influence in Central Asia and its long-term implications for the region's security.'

'This book deals with the history of the Muslim North Caucasus, one of the remaining and most rebellious colonial dominions left to Russia. The writings presented here cover a span of four centuries. It is argued that the North Caucasus has played a key role in shaping Russian colonial policy and mistrust of Islam, which has been a powerful inspiration to the resistance of the North Caucasian Mountaineers to Russian rule. The book is indispensable for understanding the future of ethnic relations and national politics in Russia.'

'The author has tackled two of the most important and vexing questions affecting the Islamic Republic of Iran : is genuine democratization possible in an Islamic context ? And if so, is the trajectory of developments in contemporary Iran pointed in that direction ? He answers yes to both of these questions. He begins with a brief examination of the Western or Orientalist critique of the Iranian revolution as a religious phenomenon. The bulk of Ansari's analysis is devoted to a careful reconstruction of the first four years of Khatami's presidency. He describes and documents the successes and tribulations of the reformist experience. Contrary to the Western image of a beleaguered Iranian reform movement thwarted and defeated at every turn, Ansari sees this continuing struggle as a process of growing maturity of political consciousness, with the conservative forces increasingly discredited and offering nothing but violence and repression. In his judgement, 'a social revolution is taking place which will lead to the institution in Iran of Islamic democracy'.'

'Many hold the view that Islam discourages freedom of thought and action. This seems to be borne out by common perception which sees Muslims as fundamentalist, radical and militant. In this book, M. J. Gohari describes the rise of a controversial movement which has been widely criticised by the West : the Taliban in Afghanistan. Dr. Gohari describes the historical background of the movement in Afghanistan, outlines the context for rapid ascent to power of the Taliban, explains what the movement stands for, and analyses how it affects various groups in Afghan society. He also discusses the impact of the Taliban on Afghanistan's neighbours and what he calls 'the Taliban-UN dilemma'. Gohari concludes with a short chapter on the life and views of Bin Laden, which serves to demystify that elusive radical.'

'L'islamisme est devenu ces trente dernieres années un acteur incontournable de la geopolitique internationale - même s'il a commencé à amorcer récemment un déclin inexorable. Du Maghreb à l'Asie centrale, de la Turquie au Golfe persique, en passant par le Proche-Orient, ou encore le Pakistan, l'Afghanistan, les pays musulmans de l'ex-URSS, l'Indonésie, la Malaisie, l'Inde, le Cachemire ou le Bangladesh, l'islamisme recouvre une diversité de tendances, de stratégies et de sensibilités; celles-ci dépendent largement de contextes politiques nationaux et régionaux variés, et conduisent bien souvent à des positions relativement différentes - à l'égard notamment de la question de la participation démocratique et légale au jeu politique comme à l'égard de la violence. L'ambition de ce livre est de rendre compte de ce phénomène dans sa globalité, à travers l'ensemble du monde musulman, depuis son émergence jusqu'à aujourd'hui. Il s'agit d'analyser de manière synthétique son évolution sur le long terme, d'expliquer le jeu des différents acteurs en fonction de la situation politique concernée ainsi que les objectifs des différents courants impliqués. On peut ainsi envisager la manière dont l'idéologie islamiste se modifie en fonction des aléas du contexte social, du degré d'ouverture du champ politique, mais aussi des ambitions des cadres dirigeants, des aspirations des militants et des sympathisants et de leur rapport au pouvoir. Enfin, l'auteur analyse les raisons de l'impasse politique et culturelle qui semble caractériser aujourd'hui l'islamisme malgré ses potentialités de mobilisation.'

'Si le socialisme a echoue en Algerie, comme dans d'autres pays du monde arabo-musulman, comment garantir la reussite de la democratie ? Si le parti unique a etouffe l'initiative, bloque la societe, qui peut assurer que le multipartisme enfantera la liberte et le progres ? Et si nous vivons la fin des ideologies, que'en est-il de cette notion essentielle qu'est la modernite ? Pouvons-nous la refuser en nous reclamant du principe identitaire ? S'agit-il alors d'un repli sur la nation, ou d'un refuge dans la foi erigee en ideologie ? Le retour aux sources des reformistes musulmans, c'est-a-dire a la purete du dogme, est insuffisant pour nourrir une pedagogie du redressement national ou civilisationnel. Un autre retour aux sources s'impose : celles, longtemps bafouees, de la pensee en tant que donnee anthropologique, origine du redeploiement critique.'

'Peut-on philosopher sur la perception de l'image complexe et ambiguë que le regard islamique porte sur ce qu'il appelle tantôt Occident ou Europe, tantôt Nord ou Ouest ? Cette perception est souvent chargée d'émotion et de controverse qui conditionnent la pensée de diverses élites musulmanes, arabes et non-arabes confondues. Nombreuses sont les études qui ont tenté d'apporter leur contribution à l'évaluation de la problématique posée par la question de l'autre, qui accapare l'esprit de ces élites. Cet autre peut, à la fois, être proche et lointain, et appartenir à un univers fascinant et conflictuel. L'ambition de cet essai est qu'il tente de cerner l'essentiel de la pensée des différentes tendances et écoles qu'elles soient libérales, laïques ou bien intransigeantes et pan-islamiques, en s'appuyant sur leurs textes initiaux. Des

'The presence of Osman bin Laden and his terrorist bases in Afghanistan have brought the Taliban into sharp focus as the most radical and extreme Islamist movement in the world today. Little is known about the Taliban because of the deep secrecy that surrounds the organization, its leaders and aims. The geo-strategic implications of Taliban expansion are already creating severe instability in Russia and Central Asia. The Taliban has become a major player in the 'New Great Game'- harking back to the late nineteenth-century British and Russian confrontation in the region - involving competition between Western oil companies, manipulation from Pakistan, Saudi Arabia and Iran, and covert operations by the CIA. The prize : access to the new oil fields and transit routes for oil pipelines, not to mention the allure of the narcotic trade.'

- Abou-Diab, Khattar
L' islamisme au Proche-Orient : origines et perspectives.
RELATIONS INTERNATIONALES ET STRATEGIQUES, no. 21, printemps 1996, p. 43-49.
There is an increasing influence of a radical islamism in the Middle East. It has sought to stand out on the political scene as the main political stream and as a genuine alternative force. The Muslim Brothers, at the very offspring of the phenomenon, have asserted themselves since the 1930s. The chiite trend has developed later on, after the Iranian revolution of 1979. The paths followed by Islamism have had different influences on the political life of the countries under focus : islamism is firmly established in Egypt and Jordan, whereas it has met more difficulties in spreading out in Syria and Iraq. As that of the whole of the societies in which they evolve, the lot of these movements mainly depends on democratization and on the social and economic improvements in the area.

- Ahmed, Akbar S.
Towards the Global Millennium : The Challenge of Islam.
WORLD TODAY, vol. 52, no. 8-9, August - September 1996, p. 212-216.
The author points out why some of the most influential current global theories about Islam's relations with the West are inadequate. He then explores an alternative method of understanding what is happening in the Muslim world through a discussion of Muslim political structures and leadership. This helps explain Islam's present predicament and its sometimes thorny relations with the West. In conclusion, the author suggests ways to improve mutual understanding.

 Islam in the North Caucasus.
 JOURNAL OF SOCIAL, POLITICAL AND ECONOMIC STUDIES, vol. 26, no. 3, Fall 2001, p. 569-588.
 Religious diversity has had a dramatic impact on the development of the North Caucasus region. People do not identify primarily with either a national or international Islamic community, although the fundamentalist Vakhabite community has become a major regional force during the past decade. Numerous official attempts to suppress Vakhabite influence has resulted in the emergence of a clandestine Vakhabite network supported by Islamic radicals from abroad, mostly of Saudi and North African Arab origin. These have joined with the Khattab group to receive military training in terrorist camps in support of the Chechen resistance to Soviet forces. Following the first Chechen war (1994-1996), differences arose between the Sufi and Vakhabite movements, with Sufi Muslims calling for a creation of a secular state that would preserve traditional social patterns, while Vakhabites demanded the eradication of local customs which they regard as having tainted Islam purity.

 L' Islam vu de Washington.
 POLITIQUE INTERNATIONALE, no. 82, hiver 1998 - 1999, p. 81-105.
 For the last twenty years, Washington's diplomatic efforts have focused on a single obsessional goal : contain Iran. All means were fair in this anti-Shiite crusade, even the most absurd. For example, the US Department of State got mixed up in the traditional conflict between the Sunnis of Saudi Arabia and the Shiites of Iran, providing blanket support to the repressive regime in Riyadh, for no other reason than to harm Tehran. Even the US's Iraq strategy was the result of this *idee fixe*. Following the Gulf War, the US gave Saddam Hussein free rein, enabling him to massacre his own Shiite people. In this sense, the US achieved its strategic goal : Iran lost all influence in Afghanistan and Iraq. But the US is beginning to pay a very high price for this victory, with the Taleban taking power in Kabul, and the rise of fundamentalist hardliners in Saudi Arabia. This in turn has led to a rapprochement with Iran over the past few months, as well as a much harder line with Iraq as shown by the air strikes of mid-December.

 A Fundamentalist Islamic Threat to the West.

 Often ignored as irrelevant or exaggerated out of proportion, Islam is poorly understood as a motivating force governing the relations between Western and Muslim countries. A better understanding of Western fears of Islamic fundamentalism and an explanation of Muslim actions in the international arena is gained by placing basic Islamic precepts in context. The greatest fear Westerners hold is of a united fundamentalist Islamic force organized against them, a fear reminiscent of the fear of communism. Although such fears are largely unfounded, other problems inherent in Muslim states due to Islam do threaten to destabilize the region. Sustaining relations between these two historically hostile camps entails reducing interference from the West while Islam allows itself to evolve from its tradition-ridden bonds. Under the right conditions, the potential for the similarities of both sides to override the differences is good.

 L' Islam en Europe.
 PROBLEMES POLITIQUES ET SOCIAUX, no. 746, 24 mars 1995, numero entier.
 L'Europe occidentale compte une population de plusieurs millions de musulmans installés à demeure pour des raisons historiques et économiques. L'institutionnalisation de l'islam, son affirmation dans des sociétés laïques mais encore imprégnées de culture chrétienne, empruntent des formes parfois différentes comme le montrent les exemples de la France, de la Grande-Bretagne, de la RFA, des Pays-Bas, de la Belgique et de l'Espagne. Ces différences tiennent au morcellement de la communauté musulmane mais aussi aux conceptions des pays d'accueil en matière de relations entre les Églises et l'état, d'exercice de la citoyenneté, ou encore d'accès à la nationalité. Par ailleurs, la perception de l'islam patit du développement de l'intégrisme. Cependant, des convergences ne s'opèrent-elles pas au sein de l'espace communautaire ?

Political Islam and the West.
MILITARY TECHNOLOGY, vol. 25, no. 2, 2001, p. 89-97.
At the dawn of the 21st century political Islam, or more commonly Islamic fundamentalism, remains a major presence in governments and oppositional politics from North Africa to Southeast Asia. New Islamic republics have emerged in Afghanistan, Iran, and Sudan. Islamists have been elected to parliaments, served in cabinets, and been presidents, prime ministers, and deputy prime ministers in nations as diverse as Algeria, Egypt, Indonesia, Jordan, Kuwait, Lebanon, Malaysia, Pakistan, and Yemen.

The Islamistic Challenge.
AUSSENPOLITIK, vol. 48, no. 1, 1997, p. 79-90.
In the Islamic region between Maghreb and Pakistan the nationalism inherited from Europe is yielding ground to Islam on a substantial scale - in other words, to a fundamentalism which takes Islamic doctrines into the political sphere and attaches absolute religious value to the secular postulates derived from that sphere. Viewed historically, this is the second attempt by Arab and other peoples to achieve emancipation from Western dominance after national efforts towards independence failed by and large to achieve this goal. On this basis the Islamic tendencies must be regarded as phenomena with a long-term rather than transitory impact. The author here examines how the Islamics derive their principles from Islamic teachings (which also show other lines of tradition) and what challenge confronts a world formed by European influence.

The Decline of Revolutionary Islam in Algeria and Egypt.
SURVIVAL, vol. 41, no. 1, Spring 1999, p. 113-125.
Despite savage killings in Algeria and intermittent attacks on government officials and foreigners in Egypt, the Islamist advance has come to a halt in both countries. Revolutionary Islamists no longer represent a real threat to the survival of the secular authoritarian regimes in the Middle East. Brutal as their methods have been, militant Islamists could not match the counter-violence unleashed by these regimes. The regimes' military successes have not, however, led to peace, and their campaigns have yet to crush Islamist insurgency. Authoritarian policies from Cairo and Algiers have marginalised and alienated the militant Islamist opposition, pushing it towards the politics of terror. In the absence of substantive political and economic reforms, low-intensity conflict is likely to continue for the foreseeable future.

The Egyptian state appears to have weathered the storm of violent Islamist opposition from al-Jama'a al-Islamiyya and Jihad which lasted from 1990 until the Luxor attack of 1997. Its successes stem in part from the internal divisions of the Islamist movements. This article examines both the means by which the government overcame the Islamist challenge and the implications of continuing government exclusion of mainstream Islamist movements from political life. It also examines implications for US policy.

 FOREIGN AFFAIRS, vol. 72, no. 2, Spring 1993, p. 27-42.
 With the end of the Cold War many at home and abroad are urging the United States to prepare for a new long struggle against radical Islam. But Islam is neither a threat to the United States nor a unified political phenomenon. Iran, the supposed center of Islamic fundamentalism, has pursued a foreign policy dominated by geopolitics, not religion. In the rest of the Middle East, Islam has become the language of political opposition to a thoroughly corrupt status quo. By blindly supporting autocratic Arab regimes against these popular movements, the United States will turn the threat of Islamic fundamentalism into a self-fulfilling prophecy.

 This article investigates the formation of the principal armed Islamist groups in Algeria - the GIA and AIS - and their justification for armed struggle. Furthermore, it investigates the extent of Islamist involvement in the violence witnessed in Algeria since 1992, especially the massacres since 1997. It argues that these two groups formed as much in opposition to each other as in opposition to the state. Moreover, their violence took different forms because they adopted different justifications for Jihad.

 AUSSENPOLITIK, vol. 47, no. 2, 1996, p. 146-155.
 Since the end of the Cold War, Islam has become a growing focus of international public awareness. One of the many reasons for this is the emergence of new states with an Islamic background on the territory of the former USSR. In the West, the ideas associated with this development are determined by the conditions and developments which exist elsewhere in the Islamic culture complex. In this article, the author makes clear that the situation in the Islamic areas of the Caucasus and Central Asia is, to a large extent, shaped by its own determinants and must thus also be assessed in a different light.

 Islam Karimov en de islam in Oezbekistan.
 INTERNATIONALE SPECTATOR, jg. 54, nr. 11, november 2000, p. 576-579.
 The author reports on the emergence of Islamic fundamentalism in Uzbekistan. President Karimov frequently emphasizes the danger of 'those bandits whose arms are covered in blood' and hence pursues a policy of strong repression towards Islamic fundamentalist groups such as the Islamic Movement of Uzbekistan (IMU). But the Islamic threat that Karimov claims he needs to resist is less of a threat than may appear at first glance. In Uzbekistan a strong growth of the number of fundamentalists is not likely in the near future, as the anti-religious measures and atheist propaganda of the former Soviet regime have had a profound impact. Many children received an atheist upbringing, while military conscripts were completely cut off from any contact with islam. Perhaps Karimov's struggle must be viewed as a pretext to continue his autocratic rule.

 The author surveys here the historical 'clashes of civilizations' between
 the Western and the Islamic world and wonders whether Europe and the
 United States should be prepared for a new clash. That this is a
 realistic point of view is explained by the fact that both systems strive
 for universality of which Western colonialism, or imperialism, is the
 most recent pression. In the Islamic world this emphasis resulted in
 autocratic governments, and in opposition, especially of a religious
 character. This Islamic fundamentalism opposes the Western system of
 separation between states and church, which implicates a clash between
 the Islamic countries and the Western world.

 the nature of Islamist political parties, and a brief insight into
 aspects of funding of these parties. For the sake of some form of
 coherence, the area under study is that of the Arab world only, since an
 overview of all Muslim countries would be too vast an enterprise.

 The debate in the US policy community is conducted at the normative, philosophical, civilizational, politico-economic and geopolitical levels through the media, academia and politics. The issue here is the US response to the global resurgence of Islam. Three groups in the policy community are identifiable : the practitioners, US government officials using the logic of interests; academic scholars of Islam and the Middle East; and 'policy entrepreneurs' drawn from a broader, mixed background who seem to be driven by ideological policy preferences. This third group promotes in particular a view of Islamic fundamentalism, which links it uncritically with terrorism and anti-Western and anti-modernist dispositions. They emphasize the incompatibility of Islam and democracy. By occupying the centre stage of the debate, they hamper serious and balanced analysis by those formulating US foreign policy towards the phenomenon of modern political Islam. The USA and the West would do well to listen to the views academics advance and avoid those that favour short-term goals and the exclusion and repression of Islamists.

 Significant differences between fundamentalist Muslims concerning the legitimacy of violence and the nature of Muslim government weaken its future in the longer term. When these differences are added to the increasing rejection by many in Iran, for example, of traditional Muslim strictures, and to the inevitability of progress towards modernity, it is concluded that fundamentalist Islam is not here to stay. It is a temporary phenomenon.

 The Threat of Militant Islam : A Fundamental Reappraisal.
 STUDIES IN CONFLICT AND TERRORISM, vol. 19, no. 4, 1996, p. 353-364.
 This article begins by examining some possible flashpoints in the Middle East, where fundamentalist Islamic groups might seem to represent a threat : Iran, Egypt, and Saudi Arabia are examined along with other countries. If a fundamentalist interpretation of the Qur'an is taken and the teachings of certain fundamentalist Islamic leaders are examined, the conclusion is made in this article that fundamentalist Islam does appear to represent a threat in theory. Since in practice, however, fundamentalist Islam actually represents a broad spectrum of religious and political beliefs, much of which rejects violence, it is concluded that, although what is termed as fundamentalist Islam in theory represents a threat, in practice it does not. Were fundamentalist groups to take political power in some areas of the Middle East, the article goes on to suggest that this, too, should not necessarily be seen as a threat : many are beginning to see such a development as a possible step on the road to democracy.

 Islamist Perceptions of the United Nations and Its Peacekeeping Missions : Some Preliminary Findings.
INTERNATIONAL PEACEKEEPING, vol. 5, no. 2, Summer 1998, p. 38-63.
 The portrayal of Islamic fundamentalism (Islamism) as the new security threat to the West has coincided with a considerable build-up of Western military capacity for humanitarian interventions and peacekeeping. Presumably, the juxtaposition of these trends adds to the legacy of Western domination and will affect negatively Western participation in peacekeeping in the Muslim world. To address this issue, this article discusses Islamist perceptions of the United Nations and its peacekeeping missions. It is argued that despite the vehement denunciation of the West by the Islamists, this hostility is not automatically extended to the UN, nor to its peacekeeping missions. Experience shows that UN peacekeeping missions can find a modus vivendi with the Islamists.

Or, loin de signifier l'affaiblissement du pouvoir, ces evenements démontrent, au contraire, que la strategie du régime, fondee sur une volonté de promouvoir la paix par la fusion progressive des protagonistes et l'absorption des maquisards islamistes, semble sur le point de réussir.

La these des Etats-Unis qui réduit l'attaque au seul phénomène du terrorisme et qui fait croire que l'Amérique est visée pour sa liberté, sa démocratie et sa civilisation n'est pas satisfaisante. Les rapports des Etats-Unis avec le monde islamique sont minés par une crise interne de la classe politique américaine centrée sur la question palestinienne et qui la met en contradiction avec sa propre culture et avec le consensus mondial.

Islam : Myth or Reality in Central Asia.
EURASIAN STUDIES, vol. 3, no. 3, Fall 1996, p. 73-84.
The religious revival may potentially influence the domestic political evolution of the Central Asian Republics. Islam in Central Asia, with its traditional power, synonymous with nationalism, may mobilize people, augmented with economic shortcomings to be a radical and driving social force. Yet, the lack of religious institutionalization, heterogeneity, and sectarian differences will reduce the likelihood of a fundamentalist Islamic development through external intrusions. Islam in Central Asia is not likely to experience the same revolution as the Islamic Republic of Iran. Governmental control on Islam is essential from the point of the top leadership because they have to guarantee the security of foreign capital and inter-ethnic harmony. Any radical move may too easily harm the already fragile inter-ethnic balances and inflow of foreign capital.

Towards Autonomy ? : The Islamist Movement's Quest for Control of Islamic Institutions in Israel.
MIDDLE EAST JOURNAL, vol. 55, no. 3, Summer 2001, p. 378-398.
From origins as a small clandestine association, the Islamist movement in Israel grew into a major grassroots organization with political representation at the municipal and national levels by the late 1990s. The movement has been particularly successful in mobilizing Israel's Muslim population to challenge the state-controlled Islamic institutions. The current literature tends to downplay the impact of this escalating campaign either to gain control over Islamic institutions (such as waqf, charitable endowments, and shari'a courts) or to establish autonomous alternatives wherever possible. The article focuses on this quest in order to assess the movement's development and its prospects for future communal autonomy.

MIDDLE EAST JOURNAL, vol. 53, no. 2, Spring 1999, p. 217-231.
Muhammad Khatami's election as president of Iran in May 1997 marked two important turning points in the Islamic Revolution : it inaugurated the overdue Thermidor of the Iranian Revolution by turning the politics of revolutionary Iran into politics as usual, with its own peculiar conflict and compromise; and it marked the emergence of a new generation in the Islamic movement in Iran who are here referred to as 'Islamic Yuppies'. This article examines these two trends in context. It examines the encounter of modernity and tradition within Iran's Revolution, and maps various voices within the Islamic movement in Iran and their contribution to the complicated politics of post-revolutionary Iran.

 L'emprise de l'islam en Asie centrale est inégale - profonde chez les Ouzbeks et les Tadjiks, superficielle chez les Kazakhs, Kirghizs et Turkmènes qui n'ont pas de véritable tradition musulmane et peuvent se rapporter à d'autres références. La décadence de la fin du XIX^e siècle puis la propagande antireligieuse de l'URSS ont conduit à la coexistence d'un islam officiel et d'un autre, clandestin et plus virulent qu'on ne l'avait pensé. Avec les indépendances, l'islam peut devenir la matrice d'un renouveau identitaire : il s'agit néanmoins d'un islam 'culturel' plus que du retour d'une foi et de pratiques que la plupart connaissent mal. Pour cette même raison, malgré l'aide de plusieurs Etats musulmans, on est loin d'un véritable panislamisme, même si la religion elle-même pourrait sous une forme ou une autre être instrumentalisée par le pouvoir.

 A hasty analysis of the terrorist attacks of September 11 might lead one to link them to the radical Islamic movement. And yet this is not really the case. Unlike the terrorists who since the 1980s have fought for the Palestinian or Islamic cause, Osama bin Laden has no political strategy. Nor is he pursuing any achievable goal. The destruction of the World Trade Center is simply the execution of his apocalyptic vision. The larger, traditional Islamic movements have all condemned the attacks. Those who support bin Laden come from outside the wider Islamic tradition. This distinction is key to understanding the bin Laden phenomenon. The bin Laden networks are a product of globalization and know no borders. They have no country, no social base and no program, except perhaps the application of the Sharia. Essentially, the bin Laden system is more of a sect than a political movement.

Néanmoins, contrairement à ce qui a pu être énoncé, la menace islamiste n'a jamais atteint la dimension qu'on lui a attribuée. Devenu principalement nationaliste, le mouvement islamiste se caractérise par la volonté, pour certaines franges, de s'intégrer au jeu politique traditionnel, mais également par l'apparition d'une mouvance radicale d'un nouveau type. Ces mutations en cours ne sont pas cependant dénuées de contradictions; le problème étant aujourd'hui pour le courant islamiste de trouver un langage réformiste pour rationaliser son positionnement. Enfin, il importe de remarquer que ce renouveau de la pensée politique islamiste apparaît comme relativement disparate selon les états.

 Le cassure du 11 septembre 2001 : éléments d'analyse.
 DEFENSE NATIONALE, 58e année, no. 1, janvier 2002, p. 24-40.
 Les attentats du 11 septembre 2001 sur le territoire même des Etats-Unis d'Amérique appellent deux questions : pourquoi et que faire? La présente synthèse ne prétend évidemment pas répondre à ces deux vastes interrogations. Elle a pour simple ambition de rassembler, de manière synthétique, certains éléments d'analyse, susceptibles de clarifier la réflexion globale autour des interrogations majeures provoquées par les attentats du 11 septembre 2001.

Algeria's Long Night.
FOREIGN AFFAIRS, vol. 76, no. 6, November - December 1997, p. 86-99.
One of the world's most underreported conflicts rages in Algeria, where 60,000 have died in six years of civil war. The military-backed regime, which has recently been accused of involvement in recurring massacres, has erected a facade of democracy and won the approval of France and the United States. Locked out is the Islamist movement, which scored an overwhelming victory in 1991 elections but was never allowed to take power. Other Arabs watch Algeria fearfully for omens of the countries' fates, caught between bad governments and political Islam.

Islamistisch terrorism? : Over de werking van het islamitisch slachtoffercomplex, samenzweringstheorieen en fundamentalisme.
INTERNATIONALE SPECTATOR, jg. 56, nr. 2, februari 2002, p. 67-75.
The author addresses the question: Were the September 11 terrorist attacks about Islam? Obviously, megaterrorism is rooted in anti-Western feelings. However, it is not the anti-Western attitude - a general Third World phenomenon - that points to Islam, but rather the intensity of these feelings that sets the Islamic world apart. For more than a century the Islamic-Arab world has been in the grip of anti-Western ideologies. According to the author, one may speak of an Islamic-Arab 'selfvictimization complex' expressing itself by a quagmire of conspiracy theories. The concurrence of this complex conspiracy theories and personal pathology constitute the breeding room for terrorism. Why is it that from the shocking realization in the colonial period that Europe was ahead, until the current phase of globalization, Muslim anger at the West has remained so vehement? The author argues that in the Quarnic world view, 'blessed' Islam is considered the final phase of revelation, and the successor to Judaism and Christianity, which had both become corrupted and backward. Ever since the days of imperialism, the discrepancy between the Qur'an and the daily newspapers has been confusing. The author further points to the effects of the fundamentalist revival. Western possibilities to influence this state of mind are limited but not absent, and should focus, without denying the legitimacy of certain Muslim complaints, on confronting the Islamic world with its own responsibilities.

The Rise and Fall of the Arab World.
STRATEGIC REVIEW, vol. 21, no. 3, Summer 1993, p. 33-46.
The end of the Gulf War has reinforced the belief among experts and government officials that Arab and Islamic politics are entering a more moderate, modern phase. But the belief that Arab and Islamic politics has become more pragmatic and moderate is wishful thinking, confusing adaptation to the realities of power with fundamental change. Both secular-Arab nationalism and Islamic fundamentalism are motivated by a profound antipathy to the West. Attempts by the U.S. to force Israel to make concessions will be counterproductive, since nothing short of the disappearance of Israel will satisfy Arab nationalists and Islamic fundamentalists. Ironically, therefore, the key to a stable peace in the region is a strong Israel.
