Russia and Arms Control : Are There Opportunities for the Obama Administration ? - Carlisle, PA : US Army War College.

xii, 173 p. ; 23 cm.

ISBN: 1584873817

Author(s):

1. Blank, Stephen J.

Subject(s):

1. ARMS CONTROL AND DISARMAMENT--RUSSIA (FEDERATION)
2. ARMS CONTROL AND DISARMAMENT--USA
3. USA--MILITARY RELATIONS--RUSSIA (FEDERATION)
4. RUSSIA (FEDERATION)--MILITARY RELATIONS--USA

Added entry(s):

1. US Army War College. Strategic Studies Institute (US)

Notes:

'Russo-American relations are generally acknowledged to be at an impasse. Arms control issues feature prominently in that conflicted agenda. Since the outbreak of the Russo-Georgian war in August 2008, both Russia and the U.S. have further hardened positions and raised tensions apart from the war itself and Russia's quite evident refusal to abide by its own cease-fire terms. Nevertheless, and for better or worse, arms control and its agenda will remain at the heart of the bilateral Russo-American relationship for a long time. Arms control and disarmament issues are quintessentially political as well as military issues that are among the most critical components of the bilateral relationship and regional security in both Europe and Asia. For these reasons, neither the political nor the military aspect can be divorced from the other. And for these same reasons, we cannot refuse to participate in the bilateral effort to resolve those issues.'

Russia and the United States in Search for a New Strategic Framework - Moscow : Carnegie Moscow Center.

4 p. ; 30 cm.

(Briefing Papers ; vol. 4, issue 2, February 2002)

Author(s):

1. Pikayev, Alexander

Subject(s):

1. NUCLEAR ARMS CONTROL AND DISARMAMENT--RUSSIA (FEDERATION)
2. NUCLEAR ARMS CONTROL AND DISARMAMENT--USA
3. ABM TREATY

Added entry(s):

1. Carnegie Moscow Center (SU)

Notes:

'On December 13, 2001 the United States officially notified Russia that for reasons of national security, and in accordance with

* This list contains material received as of April 7th, 2010. – Cette liste est arrêtée au 7 avril 2010.

Article 16 of the Treaty on the Limitation of Antiballistic Missile Systems (ABM Treaty), the American side would withdraw from the Treaty upon the expiry of the six month, contractually fixed notice period. This means that a document, which both parties had described as the cornerstone of their strategic relationship for almost three decades, will be terminated as of June 2002. The coming event begs many questions. Was it right for Russia to reject, for three years, the Clinton Administration's suggestions concerning a gradual and partial modification of the Treaty ? What will happen to the continued bilateral strategic arms control regimes ? Will they go the way of the ABM Treaty or will it prove possible to preserve some of them ? Will the few months left until George Bush's visit to Moscow and St. Petersburg, slated for the end of May, be enough for Russia and the United States to draw up a new document on deep strategic nuclear reductions ? Will the new document be a full-fledged and meaningful agreement rather than a meaningless sheet of paper ? Will it become an important milestone on the way to creating a new non-confrontational strategic framework between Russia and the US, or will it be a nice gesture to calm down the world public concerned by the broken ABM Treaty.'

A Nuclear-Weapon-Free-World : Steps Along the Way - Houndmills, UK :
MacMillan.

x, 283 p. : ill. ; 23 cm.

ISBN: 0333791894

Subject(s):

1. NUCLEAR ARMS CONTROL AND DISARMAMENT

Added entry(s):

1. Blackaby, Frank Thomas, ed.
2. Milne, Tom, ed.

Notes:

'International nuclear disarmament is at a standstill. This book discusses many of the steps that could and should be taken to get nuclear disarmament 'back on track'. These include de-alerting nuclear weapons, negotiating an end to production of fissile material, introducing policies of 'no first use' of nuclear weapons, increasing transparency in national nuclear weapons programmes, and developing new technologies for verification. Also needed, and discussed in the book, are alternatives to the expansion of NATO, and alternatives to negotiations at the Conference on Disarmament in Geneva. The book begins with a history of attempts to achieve a nuclear-weapon-free world, together with a refutation of arguments that pursuing nuclear disarmament is in turn too difficult, too dangerous and too distracting from other arms control issues. The book also includes an analysis of whether nuclear weapons prevented war in Europe between 1945 and 1991, and a worldwide survey of public opinion on nuclear weapons.'

Arms Control : New Approaches to Theory and Policy - London : Frank Cass.
175 p. ; 23 cm.

ISBN: 0714648132

Subject(s):

1. ARMS CONTROL AND DISARMAMENT

Added entry(s):

1. Gallagher, Nancy W., 1961- , ed.

Notes:

Includes index.

'A decade has passed since the superpowers began a series of arms control initiatives which now symbolize the beginning of the end of the Cold War, but the passage of time has not resolved disputes about the role of arms control in preserving peace. Both international relations theorists and foreign policy practitioners must decide which security strategy is most appropriate for a post-Cold War world characterized by the decline in superpower hostility and the rise of regional rivalries; the rapid diffusion of knowledge-intensive technologies; and the increasingly complex relationships between political, military, and economic issues. How should arms control theory and policy be altered to improve the prospects for cooperation ? The essays in this volume address this question by exploring the complexity of national arms control decision-making and multilateral negotiations, and the challenges of reaching domestic and international agreement on verification. Conscious that the gulf between theory and policy is growing at a time when the need for policy-friendly theory is greater than ever, the authors offer a range of jargon-free

views from the academic and policy-making worlds. Some argue that growing interdependence creates both the need and the opportunity for a radical reorientation of arms control efforts, while others contend that increasing complexity in arms control problems still constrains what can be negotiated and ratified.'

Arms Control Toward the 21st Century - Boulder, CO : Lynne Rienner.

xii, 348 p. : ill. ; 24 cm.

ISBN: 1555875610

Subject(s):

1. ARMS CONTROL AND DISARMAMENT

Added entry(s):

1. Larsen, Jeffrey Arthur, ed.
2. Rattray, Gregory J., 1962- , ed.

Notes:

Includes index.

'How should we think about arms control ? Should we pursue it as an ideology or a methodology, a goal or a tool ? Is it a field of science or a practical art ? Is arms control a new way of thinking, or is it simply diplomacy and war by other means ? Although basic answers to these questions were clarified by the arms control revolution, which occurred at the end of the Cold War, definitive answers are still evolving. This book helps provide further answers. This survey of arms control issues gives students of arms control the latest and best synthesis of lessons learned from the Cold War. More important, it points the way to a new millennium.'

1. Goldblat, Jozef

Subject(s):

1. ARMS CONTROL AND DISARMAMENT

Added entry(s):

1. International Peace Research Institute (NO)

Notes:

Bibliography: p. 756-763. Includes index.

'Providing an historical overview of arms control, this comprehensive survey analyses all international arms control agreements reached since the latter part of the 19th century through to mid-1993 and also provides the complete text or carefully selected excerpts of all the agreements covered. Each agreement is presented in its political context and its significance is critically assessed. The book also provides a comparative review of the problems of verification and compliance posed by the various treaties. Negotiations which failed to result in any agreement are also discussed and analysed. Recommendations are made regarding possible future arms control undertakings.'

Sort-ing Out START : Options for US-Russian Strategic Arms Reductions.
(JOINT FORCE QUARTERLY, no. 55, 2009, p. 47-58.)

Author(s):

1. Cimbala, Stephen J.

Subject(s):

1. START
2. SORT
3. NUCLEAR ARMS CONTROL AND DISARMAMENT--USA
4. NUCLEAR ARMS CONTROL AND DISARMAMENT--RUSSIA (FEDERATION)

Notes:

Embedded in the construction and negotiation of arms pacts are issues related to post-Cold War geopolitics, including NATO enlargement, US missile defenses deployed in Europe, and Russian military doctrine and reform. This article considers various options for US-Soviet strategic nuclear arms reductions within this larger politico-military context and offers provisional but timely assessment of prospects for success.

Triad of Terror : Post-START Reductions in Broader Context.
(EUROPEAN SECURITY, vol. 18, no. 2, June 2009, p. 201-225.)

Author(s):

1. Cimbala, Stephen J.

Subject(s):

1. START
2. NUCLEAR ARMS CONTROL AND DISARMAMENT--USA
3. NUCLEAR ARMS CONTROL AND DISARMAMENT--RUSSIA (FEDERATION)

Notes:

This paper considers the present condition and future prospects for post-Strategic Arms Reduction Treaty (post-START) nuclear arms reductions in the following sequence. First, the author reviews the essential features of the agreement between Obama and Russian President Dmitri Medvedev in July 2009, for a START follow on agreement. Second, the author discusses the larger political and military-strategic contexts within which these post-START negotiations will play out. Thirdly, the author performs an analysis to determine whether START follow-on guidelines would meet prospective requirements for mutual deterrence and, in addition, whether US-Russian reductions could safely go even lower. Fourth, the author takes a look at the estimated impact of defenses on deterrence stability under post-START reductions. Fifth, pertinent conclusions are summarized.

European Security and the Russian Duma.

(DEFENSE & SECURITY ANALYSIS, vol. 18, no. 1, March 2002, p. 75-84.)

Author(s):

1. Segell, Glen M.

Subject(s):

1. START II

Notes:

This article focuses on how the Russian Duma has increasingly played a role in European security since the onset of the process of democratization in the former Communist state. The relevance of the Duma's role for European security is to learn from past errors of judgement, particularly on the significance of who is in charge of changes in Russia. Although few would admit it in hindsight, the collapse of the USSR and the end of the Cold War was not predicted because analysts did not focus on the correct power holders and processes of change in Russia. The focus will be on the Russian Duma as a major symbol, force and source of democracy, which gives it the legitimacy and authority as a major international power deliberator via its stance on the START II Treaty.

Arms Control in Russia Today.
(COMPARATIVE STRATEGY, vol. 19, no. 1, January - March 2000, p. 69-77.)
Author(s):
1. Tarasov, Alexander
Subject(s):
1. ARMS CONTROL AND DISARMAMENT--RUSSIA (FEDERATION)
2. START II
Notes:
Prospects for continued arms control and disarmament agreement between Russia and the US are now problematic. Internally, Russia has been unable to define a coherent foreign and military policy, and the economic situation remains extremely difficult. The policy-making process can work, however, as demonstrated by the Duma's ratification of the Chemical Weapons Convention. On the other hand, START II has been subject to the vagaries of domestic politics and issues related to ABM treaty revision. On March 22, 1999, President Yeltsin submitted the Draft Law on START II ratification, revised in close cooperation between the parliament and the government. But the NATO air campaign against Yugoslavia meant that further consideration of START II was impossible. Forthcoming Duma and presidential elections raise uncertainties on START II prospects and on the structure of the post-Cold War arms-control process.

Jump-START : Retaking the Initiative to Reduce Post-Cold War Nuclear Dangers : A Report of the Committee on Nuclear Policy.
(ARMS CONTROL TODAY, vol. 29, no. 1, January - February 1999, p. 15-19.)
Subject(s):
1. START II
2. NUCLEAR ARMS CONTROL AND DISARMAMENT
Notes:
On February 25, the Committee on Nuclear Policy released a report to address the current impasse in strategic nuclear arms control exemplified by Russia's delay in ratifying START II. Nuclear dangers inside Russia are expanding too quickly to be addressed by the formal treaty negotiation process alone, argues the committee. To supplement treaties such as START II, it calls for parallel, reciprocal actions by the United States and Russia in three areas : force levels, alert status, and fissile material and warhead controls. The committee's specific recommendations include : reduction to 1,000 deployed strategic nuclear weapons on each side within a decade; cradle-to-grave transparency on all US and Russian warheads and fissile materials; elimination of the launch-on-warning option and

massive attack options from nuclear war plans; and consolidation of Russia's weapons-usable materials into the smallest possible number of locations.

1998

Competing Views on Strategic Arms Reduction.

(ORBIS, vol. 42, no. 4, Fall 1998, p. 587-604.)

Author(s):

1. Benson, Sumner

Subject(s):

1. START II

Notes:

Strategic Arms Reduction Treaties (START) I and II are intended to strengthen nuclear stability by eliminating those weapons in both the Russian and US arsenals that are most capable of carrying out a surprise attack. During the five years since START II was signed, that treaty has been widely portrayed in Russia as depriving Moscow of its most potent strategic weapon (heavily armed land-based missiles) and as making Russian nuclear forces potentially vulnerable to US long-range conventional weapons and ballistic missile defenses. These criticisms may be giving rise to a new, more Russia-specific strategic doctrine. This emerging challenge to the official US-Russian consensus on strategic stability probably will not lead Russia to reject START II (particularly in view of 1997 modifications to the treaty), but it does indicate that Moscow would be unlikely to accept the large additional reductions envisaged in several recent unofficial proposals for a 'minimum deterrent' force.

Finishing START and Achieving Unilateral Reductions : Leadership and Arms Control at the End of the Cold War.

(JOURNAL OF PEACE RESEARCH, vol. 34, no. 2, May 1997, p. 135-152.)

Author(s):

1. Baglione, Lisa A.

Subject(s):

1. START I
2. START II
3. ARMS CONTROL AND DISARMAMENT--USA
4. ARMS CONTROL AND DISARMAMENT--USSR

Notes:

In 1991, the USA and USSR reached an accord to make significant cutbacks in their strategic arsenals. A few months after the agreement was signed, the superpowers also unilaterally decided to undertake steps to decrease their readiness for war, eliminate tactical nuclear weapons, and accelerate the START reductions. While the outcomes may appear to follow from the collapse of Soviet power or domestic political developments, a closer examination suggests that a singular focus on neither power considerations nor internal politics can explain adequately these instances of arms control. Instead, leaders appear to have played a principal role, simultaneously balancing domestic political considerations against international challenges and opportunities.

Key Aspects of the Russian Nuclear Strategy.

(SECURITY DIALOGUE, vol. 28, no. 2, June 1997, p. 159-171.)

Author(s):

1. Belous, Vladimir

Subject(s):

1. NUCLEAR WARFARE--RUSSIA (FEDERATION)
2. START II
3. NUCLEAR ARMS CONTROL AND DISARMAMENT--RUSSIA (FEDERATION)

Notes:

The article provides an analysis of Russian Military Doctrine with regard to nuclear weapons, based on the assessed need to maintain strategic stability in a new geopolitical situation. The author analyses the usefulness of the START-I and START-II treaties as seen from a Russian perspective, taking into account the current and prospective structure of the Russian nuclear triad. The chances that START-II will be ratified are considered doubtful because of current US attitudes towards the ABM Treaty and recent US moves to develop a National Missile Defense. The article also analyses various concepts for the use of Strategic Nuclear Forces (SNF)- retaliation, launch-on-warning and possible first use in a conventional, defensive war.

Russia's Nuclear Drawdown : Justice Delayed or Denied ?.

(EUROPEAN SECURITY, vol. 6, no. 3, Autumn 1997, p. 66-84.)

Author(s):

1. Cimbala, Stephen J.

Subject(s):

1. NUCLEAR WEAPONS--RUSSIA (FEDERATION)
2. START II

Notes:

In this study, the author first considers whether Russia can, from the standpoint of arms control logic and strategic stability, proceed to reduce its strategic nuclear weapons without jeopardizing its security. The author's operational definition of nuclear security for Russia is essentially equivalent outcome status to that of the US following a nuclear exchange. Second, the author discusses the implications of the military-technical revolution in conventional warfare from the perspective of Russian and western military planners. He concludes that Russia can safely reduce to START II levels or below while maintaining essential equivalence in strategic retaliatory power with the US. Confidence in its nuclear deterrent may ballast Russia against present times of trouble in defence economics and against future advances in technology by Russia's Western, and other, competitors. Since, with regard to nuclear weapons, more is not necessarily better beyond a necessary minimum, Russia's nuclear weapons hold at least short term value for which conventional high-technology weapons will not be an available substitute.

Russia and Nuclear Coercion : How Necessary ?, How Much ?.

(JOURNAL OF SLAVIC MILITARY STUDIES, vol. 10, no. 3, September 1997,
p. 56-78.)

Author(s):

1. Cimbala, Stephen J.

Subject(s):

1. NUCLEAR WEAPONS--RUSSIA (FEDERATION)
2. START II
3. NATO--ENLARGEMENT

Notes:

The future of nuclear weapons in Russian military strategy and policy is based on Russian political forecasting and military threat perceptions at two levels. First, Russian assessments of US strategic nuclear capabilities are important, even if the two states are potentially cooperative security partners instead of presumed adversaries. Second, NATO's plans for enlargement bring a US and allied European military alliance system with a nuclear guarantee closer to Russia's borders. The discussion here considers how Russia might evaluate and respond to a continued START strategic arms reduction process and to NATO enlargement, and what all of that might mean for European peace and stability.

START II and the Politics of Arms Control in Russia.
(INTERNATIONAL SECURITY, vol. 20, no. 2, Fall 1995, p. 63-91.)
Author(s):
1. Lepingwell, John W. R.
Subject(s):
1. START II
2. ARMS CONTROL AND DISARMAMENT--RUSSIA (FEDERATION)
Notes:
Against a backdrop of disenchantment with reforms and their supporters, the Russian legislature is beginning to exercise its power and take a more active role in foreign policy and defense decision-making. A new and far more complex and unpredictable decision-making system is thus emerging in Russia. These developments lead to the question of what the prospects are for START II ratification and implementation.
