Striving for Military Stability in Europe : Negotiation, Implementation and Adaptation of the CFE Treaty - Abingdon, UK : Routledge.

xvii, 292 p.; 24 cm.

Author(s):

1. Sharp, Jane M. O.

Subject(s):

1. CFE

2. CONVENTIONAL ARMS CONTROL AND DISARMAMENT

Notes:

Includes index.

'This book traces the changing relationship between Russia and NATO through the prism of conventional arms control, and focuses on the negotiation, implementation and adaptation of the Conventional Armed Forces in Europe (CFE) Treaty. It shows that arms control agreements reflect rather than affect relations between parties. The CFE Treaty codified parity between NATO and the Soviet-led Warsaw Treaty Organization (WTO) in November 1990, reflecting the status quo at the end of the cold war. The benefits were short lived for Russia, however. Although still widely viewed in the West as the cornerstone of security and stability in post-cold war Europe, from the Russian perspective the treaty was soon overtaken by events. With the collapse of the WTO and the Soviet Union in 1991, it became impossible to talk of a military balance between east and west in Europe, especially as all the former WTO states opted for membership in NATO. This study details how the other state parties worked hard to adjust and adapt the treaty to meet Russian concerns about its new weakness relative to NATO, and the issues that complicated Russian acceptance of CFE limits.'

'This study contains parallel analyses of the large-scale
historical forces that shaped the CFE Treaty, on the one hand,
and the evolution of the textual intricacies of the treaty that
give it operational meaning, on the other. The study's
contribution to the literature on CFE is threefold. First, it
provides a thorough analysis and new documentation of the
political roots and practical effects of the CFE regime.
Second, it offers a unique assessment of the role played by the
CFE process in the post-Cold War transformation of Europe.
Finally, it summarizes the lessons of the CFE experience for
future conventional arms control initiatives.'

The CFE Treaty : A Cold War Anachronism ? - Carlisle Barracks, PA : US

Added entry(s):
1. US Army War College. Strategic Studies Institute (US)
Notes:
'This monograph examines the CFE Treaty with respect to the
process of implementation to date and prospects for final
implementation in November 1995. The author describes the basic
points of the treaty and the danger posed by the ongoing
disagreement between NATO and the Russian Federation over the
limitations imposed by the treaty on Russian forces in the

'flank areas'. He analyzes the positions of the primary NATO members, Russian Federation, and Ukraine, as well as the United States; and places the treaty in the broader context of Russian foreign policy and the future of conventional arms control.'

'This book examines the CFE Treaty both in terms of the Treaty commitments, and in terms of the debate over the Treaty and its ratification in order to deepen understanding of the different national attitudes to security at the end of the Cold War. It includes an analysis not only of the Treaty of November 1990, but also the revised version of 1992 (which sets out the limits for all the ex-Soviet states), and the CFE 1A agreement, in which states declared maximum levels for their military personnel.'

'This analysis of the CFE treaty provides an assessment of both its provisions and strategic implications. The author describes how the negotiations evolved to produce an overall balance of conventional military forces in Europe, as well as the extraordinary verification measures. He explains the issues in the controversy over the data provided by the Soviet Union. While demonstrating the way the CFE Treaty has achieved its original objectives, he concludes that its provisions fall short in meeting tomorrow's security challenges, especially those of Europe's newest democracies.'

'The end of the Cold War in Europe has been accompanied by a fundamental questioning of the USSR's model of 'militarised socialism'. While profound strategic changes and deep cuts in conventional armed forces have been taking place on the European continent, Soviet domestic politics have been influenced by heated debates over a wide range of civil-military issues. The author shows here how central are internal military questions to the past, present and future of the USSR. His book reviews aspects of Soviet reform politics to which western writers on the left have tended to pay insufficient attention. For the author, an appreciation of the level of militarisation of Soviet society, and of the ways in which this is now being challenged, is crucial for an adequate understanding of this perestroika period.'

Subject(s):
1. CFE
Notes:

This article evaluates the CFE as a cornerstone of European security and its ability to mitigate the European security dilemma problem. Three broad questions must be answered in order to do this : (1) has the security dilemma problem in Europe been mitigated by the original CFE treaty as negotiated in 1990, in the review process of 1996, in the adaptation process of 1999, and in the 2001 review process ?; (2) if the CFE has helped mitigate the security dilemma problem, does this mean that the treaty has lost relevance for European security ?; (3) if the CFE has not resolved the security dilemma, due to either regional or international level problems, does it have the resources and the institutional capacity to continue towards this goal, or can it serve wider purposes ? This article answers these questions by examining the level of community and the adaptability of the CFE, two terms developed here using the criteria for evaluating arms control regimes elaborated by specialists in arms control. As such, the article measures the CFE against broader understandings of arms control treaties. The paper concludes by examining the importance of the CFE and the broader issue of arms control in the post-September 2001 world, including its role for Canada.

1. CFE

Notes:

The CFE Treaty is often described as "the bedrock of European security." The path to the Treaty was long and tortuous with its subsequent evolution and development punctuated by acute struggles. The CFE history, like a mirror, reflects the contradictions of the period of transition from a bipolar world to a new state of international relations.

Notes:

After nearly three years of negotiations, on November 19 of last year at the OSCE Summit in Istanbul the 30 states parties to the Conventional Armed Forces in Europe (CFE) Treaty signed a treaty adaptation agreement which replaces the outdated, Cold War era structure of the original treaty. This article briefly addresses, first of all the history of the CFE Treaty. Then the main revisions to the treaty and the major obstacles which had to be overcome during the negotiations are analysed.

Notes:
The pressures on the Alliance to deal with the foregoing challenges as a new strategic concept is being developed are revealed most clearly in the evolution of the CFE Treaty. After a brief review of the issues and processes marked for review, this article examines changes agreed or under way in the treaty, itself a symbol of the hopes and fears of nations and international institutions regarding the role of the Russian Federation in European affairs. Other aspects of the convergence of NATO-related initiatives are analyzed and summarized.

Subject(s):
1. CFE

Notes:
The Treaty on Conventional Armed Forces in Europe is the most comprehensive and successful arms control agreement for conventional weapons of all times. Since its signing by the then member states of NATO and the Warsaw Pact, more than 58,000 conventional weapons were destroyed and more than 3,000

inspections were performed in monitoring the observance of the treaty (verification). However, this success should not obscure the fact that the CFE treaty needs to be revised in some respects. The security environment during the phase of origin has drastically changed. Germany's reunification was still possible to be taken into account in the negotiations of the treaty, but not the - already foreseeable - disintegration of the Warsaw Pact, the break-up of the Soviet Union, and the splitting up of Czechoslovakia into two republics. Really important was only that the decisive goal - the treaty's entry into force - was not be jeopardized by the changes in the security situation.

Subject(s):

1. EUROPE--NATIONAL SECURITY
2. CFE
3. NATO--EUROPE

Notes:

This article considers the interaction of NATO and the Conventional Forces in Europe Treaty as two principal tools for providing post-Cold War European security. The article suggests that the conventional wisdom, which typically envisions CFE adaptation as a bill-payer to placate the Russians over NATO enlargement is wrong because CFE has very little flexibility to perform this role. Rather, it is NATO modernization which must account for the larger share of change in European security. Finally, the article suggests a symbiotic relationship between NATO and CFE in which CFE shapes the environment and limits the size of likely conflicts to dimensions that NATO can handle, and NATO provides the military response necessary to deal with the trouble.

Notes:

The CFE Treaty has been a huge success, achieving the elimination of thousands of tanks and other armaments across Europe. However, the bloc-to-bloc context in which the Treaty was originally negotiated has been overtaken by the transformed security situation in Europe. The author explains how the challenge of adapting the Treaty to the new parameters of European security has been taken up by NATO.
