This report consists of : -4- pages

1. Situation update according to information received by UNOCHA:

1. The number of persons evacuated from the flood-affected regions in north-west Albania has risen from 3,752 to 4,025 persons (1,010 families). The number of houses flooded (in whole or in part) stands at 2,205.
A total of 10,270 ha of farmland is flooded and 9,830 livestock are at risk. Because of serious damages to the water supply system, many in the flooded communities don't have access to drinking water. There are damages to agricultural and transport infrastructure, making the area around Shkodra only accessible by small boats.
2. Most of the evacuees are staying with relatives, and some are staying in hotels and student dormitories made available for this purpose. Temporary shelter for about 4,000 persons is still available close to the affected areas. Some refuse to be evacuated.
3. According to an Italian dam stability expert, the three hydro-power plant dams in the Drini River that held high water levels because of the snowmelt and the rains, are stable and in good condition.
4. The Government of Albania stated that another 16,000 – 20,000 persons (4,000 – 5,000 families) may still need to be evacuated. More bad weather is expected in the days ahead.

5. Coordinated Response

With a view to providing a coordinated response to the stricken nation's requirements, nations in a position to meet these demands, in full or in part, are invited to reply to the Operational Point of Contact of the Stricken Nation, with an information copy to EADRCC, by any of the communication means listed above and below.

The EADRCC is in close contact with the United Nations Office for the Coordination of Humanitarian Affairs (UN-OCHA) in Geneva.

Information about assistance offered and provided has been compiled from inputs received from EAPC national and UN authorities, which does not imply the EADRCC's active involvement in each of the co-ordination processes.
