This report consists of : -4- pages

### 1. Situation update:

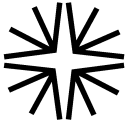

1.1 Due to continuous rainfall since mid-November 2010, water levels in the lakes and on the rivers have been rising. As a result 12 Montenegrin municipalities (out of 21) have been continuously flooded.

1.2 **The water level is slowly decreasing in the Skadar Lake and in the accumulation lakes around Nikšići (Slano, Krupac and Vrtać). According to the national authority report as of 11 December 2010, the number of affected families stands at 2,000, out of which 1,680 have been evacuated.**

1.3 In the middle region of the country - in the city districts of Golubovci and Tuzi the level of the Skadar Lake is decreasing. In the complete endangered area, activities for the distribution of water in bottles and in the tanks of JP “Cistoca”, as well as the distribution of food packages, gas etc are performed with priority. The disinfection of objects from which the water withdrew had been done whenever it was possible. The road Ponari -Zabljak Crnojevica has been cut off.

1.4 In the southern part of the country - The level of river Bojana is in slight decrease. Special teams from Poland pumped out the water from the flooded objects. In the northern part of the country – The level of the river Lim and smaller rivers is decreasing. Measures taken by Montenegrin authorities.

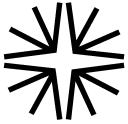

NON - CLASSIFIED

- 2.1. The rescue operations and evacuation have been carried out by the Montenegrin Armed Forces, the Police Directorate and the Civilian Rescue Agency. The operations have been carried out by the Ministry of Interior.
- 2.2. The affected population is constantly helped by supplying food, water, hygienic means and forage. The evacuation of population, livestock and properties, and the provision of health care are still continuing.
