'The CSIS Eastern Europe Project is engaged in the transformation process in several parts of Central and Southeast Europe. The project is additionally engaged in an ongoing analysis of broader political trends encompassing 20 states and aspiring states in Eastern Europe, including the political and security impact of NATO and European Union enlargement. The Eastern Europe Project launched an innovative initiative on the extensive debate on NATO's evolution. The initiative began shortly after NATO's Washington summit in April 1999, which was held at a critical time, in the middle of NATO's first military campaign against Serbia, and in the midst of major decisions on alliance enlargement and NATO's evolving mission in a new security environment. The CSIS initiative on NATO's evolution was designed to address the question of enlargement and institutional adaptation by promoting dialogue and informed decisionmaking on issues essential to US national interests and European security. This guide provides an overview of the ongoing debate through condensed descriptions outlining the key factors in NATO's evolution since the early 1990s. It serves as a general guide to the various texts, positions, and arguments contained in the voluminous materials that are systematically compiled in the CSIS NATO Debate Database. The guide helps to frame many of the issues that have confronted the alliance.'

Notes:
'The new agreements between NATO and Russia and between the United States and Russia create opportunities for strengthening bilateral and multilateral military activities throughout the former Soviet Union. These could embrace all the militaries of the former Soviet Union and not only enhance military security in the Commonwealth of Independent States (CIS), but also foster military-political integration with the West and possibly defense reform in all or at least some of the CIS regimes. Most importantly, Russia is pledged to cooperate in these activities. This monograph explores the unprecedented opportunities that are now before the United States and recommends actions that the Government and armed forces, especially, but not only the US Army, should undertake to consolidate and extend the newly emerging military partnership and cooperative security regime that are now developing. Because the opportunities being presented to the United States and NATO were never possible before to this degree, the proper way to exploit them will become a subject of debate.'

'The immediate and long-term importance of Russian thinking about NATO expansion eastward has been badly underestimated in the West. Indeed, most Western analysis has striven to provide justification for the West's policy of enlarging the alliance rather than examining its potential drawbacks. Although the NATO issue has been articulated primarily by the Russian elite, it has manifested itself in a rising reservoir of ill-will toward the West that cannot be ignored. In this book the author seeks to remedy that oversight by a thorough examination of Russian official statements, expert analysis, party platforms, and media commentary. Taken together, they show the degree to which NATO expansion has brought a rare unity to the otherwise fragmented and volatile Russian political arena. The author first provides a detailed account of Russian reactions to NATO's plans since the early 1990s. He then analyzes how the NATO question shapes Russian strategic thinking, military reforms, and election campaigning, and how it affects Moscow's relationship with Ukraine, the Baltic States, China, and the CIS. Crises in Yugoslavia and Iraq are used as case studies. Based entirely on Russian-language sources, this timely study provides invaluable insights into current Russian thinking on NATO expansion and projects the significance of such thinking for the Western Alliance into the future.'

Civilian and military experts and academics from NATO countries and Russia reviewed during this conference the achievements of the first year of NATO-Russia cooperation and discussed such important problems like putting the Founding Act into practice, formation of a new European security system, peacekeeping, civilian emergency planning and other non-military aspects of
cooperation, perspectives for the development of relations between NATO and Russia.'

Notes:
'NATO's enlargement has brought it to the borders of the Baltic States who covet membership in NATO. However, admitting them into NATO is one of the most difficult problems for the Alliance because of Russia's unconditional opposition to such action and because of NATO's own internal divisions on this issue. Nonetheless, a new regime or system of security for the entire Baltic region must now be on the US and European agenda. The key players in such a process are Russia, Germany, and the United States. Their actions will determine the limits of the possible in constructing Baltic security for the foreseeable future. In this study, Dr. Blank presents a detailed and extensive analysis of these three governments' views on Baltic and European security. Their views on regional security are materially shaped by and influence their larger views on their mutual relations and policy towards Europe. Their views also demonstrate the complexity of the issues involved in constructing Baltic, not to mention European, security. But because NATO enlargement is the most serious foreign policy and defense issue before Congress now, such an analysis can illuminate much of what is happening in the NATO enlargement process and why it has taken its current shape.'

NATO relations with Russia have seemed to develop in ups and downs throughout their entire history. But even at the stages of cooperation they have followed the 'one step forward, two steps back' formula. Moscow's relations with the alliance have always been hostage to inner processes of transformation of both parties, the micro-vectors of which have not necessarily coincided all the time. This article analyses the principal differences between Russia and NATO in the recent past and lessons learnt from these contradictions. It then characterizes the current status of relations and the impediments to deeper cooperation, including lack of trust and interoperability. As for the future, the author maintains that NATO-Russia relations have reached a certain ceiling and may stay like this for

Notes:
The author advocates the establishment of a combined NATO and Russian military force to meet the challenges of the post-9/11 world. He cites the continuing threat of transnational terrorism and the proliferation of weapons of mass destruction to call for a NATO-Russian force based on the 'NATO-Russia Contingency Command' first suggested in 1996. The author analyzes and refutes each of the many arguments against the establishment of such a force and determines that now is the time for NATO and Russia to take the next major military step in their maturing relationship: the establishment of a NATO-Russia Contingency Command based in Russia.

The terrorist attacks of 11 September 2001 helped persuade decision-makers in both NATO member states and Russia that they had an interest in a broad rapprochement. Given earlier false dawns for NATO-Russia relations, it still took a leap of faith from both sides to form in May 2002 the NATO-Russia Council (NRC), a body where NATO members and Russia could meet as equal partners to discuss and develop areas of common interests, assuming the same rights and the same responsibilities for implementation of decisions. The NRC took on an ambitious agenda and has racked up an impressive array of achievements in its first 18 months. But it still has a long way to go to achieve its full promise. Many in the West continue to view Russia with an almost instinctive suspicion, and many in Russia continue to harbour fears about NATO's intentions. Nevertheless, NATO and Russia share an interest in spreading peace and prosperity and individual differences and historic rivalries are gradually yielding to a broader spirit of partnership.

  11 September 2001. This date has already entered international parlance as a single set of numbers that needs no further explanation: '9-11'. The shock to the United States was also a shock to the international system, to a degree and in a way that is still not entirely apparent. One immediate result of 11 September was a change in Russian policy toward the United States and - eventually - to NATO. This change, which is described and analyzed in this article, may prove to be only tactical - a set of moves by Russian President Vladimir Putin to take advantage of circumstances; or it may prove to be of strategic significance: presaging a more lasting Russian engagement with the West, its powers, and its institutions. To assess the possibility of such a more lasting engagement, it is first necessary to understand what has happened in Russia's relationship with the West and - in particular for this article - the North Atlantic Treaty Organization.

Notes:
Comment associer la Russie à l'architecture de la sécurité européenne ? Si, durant toute la décennie 1990, cette question est restée en suspens, notamment en raison des tensions entre Moscou et l'OTAN et des reticences de l'UE à étendre le champ du dialogue au domaine sécuritaire, elle a pris un certain relief avec l'arrivée au pouvoir de V. Poutine et, plus encore, avec les événements du 11 septembre. Après avoir tenté de contenir l'influence de l'Alliance atlantique en proposant d'abord de faire de l'OSCE le pivot d'une sécurité paneuropéenne, puis en manifestant un intérêt croissant pour la construction de la Politique européenne de sécurité et de défense (PESD), la Russie a pris conscience qu'une attitude plus amène à l'égard de l'OTAN servirait mieux ses intérêts. De leur côté, les pays occidentaux s'accordent à la reconnaître, depuis les attentats contre les États-Unis, comme un partenaire majeur dans la prévention des nouvelles menaces pesant sur la planète. De nouveaux mécanismes de coopération ont été mis en place, comme des réunions mensuelles entre Moscou et l'UE et le 'Conseil à 20', OTAN-Russie. Même si la véritable portée de ces changements institutionnels suscite un certain scepticisme dans ce pays, il n'en reste pas moins qu'ils lui permettent de s'ancrer plus solidement dans le jeu de la sécurité européenne et, partant, sur la scène internationale.

Russia and NATO toward the Twenty-First Century: Conflicts and Peacekeeping in Bosnia-Herzegovina and Kosovo.

2. KOSOVO (SERBIA)--HISTORY--CIVIL WAR, 1998-1999--RUSSIA (FEDERATION)
3. YUGOSLAV WAR, 1991-1995--RUSSIA (FEDERATION)

Notes:
The new Russian-NATO relationship plunged to the lowest point during NATO's 78 day Kosovo air campaign in Spring 1999. Despite the difficulties at the political level, the analysis suggests that Russia's participation in joint peacekeeping with US/NATO forces in Bosnia-Herzegovina (IFOR/SFOR) and Kosovo (KFOR) stand as perhaps the most encouraging aspect of the contemporary Russian-NATO relationship. These successes in peacekeeping tended to be overshadowed by the serious strains between Russia and NATO in developing a response to the implosion of Yugoslavia. While such practical cooperation between Russia and NATO can contribute to eroding the barriers of the past and to the development of a constructive relationship for the twenty-first century, these military-to-military accomplishments cannot shape broader Russian-NATO strategic priorities. The article concludes with examination of Moscow's post-mortem assessments on Kosovo and evaluation of prospects for the future of the Russian-NATO relationship in the aftermath of the Yugoslav experience.

Notes: Relations between NATO and Russia have evolved through six distinct phases since December 1991. An initial 'honeymoon' in 1991-93 was followed by deterioration. This was temporarily arrested in 1996-97 by NATO upgrading its institutional links with Russia. The relationship was severely tested during the Kosovo crisis in early 1999. Relations were not severed, however, and a gradual rebuilding occurred from the summer of 1999. The impact of 11 September 2001, finally, has been limited. Since 1991, the development of NATO-Russia relations has been uneven. Overall objectives have not been identified by either side. Nevertheless, an underlying stability has become apparent in the relationship.

Notes: En se rangeant aux cotes des Etats-Unis dans la lutte antiterroriste au lendemain des attentats du 11 septembre, le président Poutine a modifié la donne en ce qui concerne l'avenir de l'OTAN. Certes, le premier élargissement de l'Alliance, qui a accueilli la Pologne, la Hongrie et la République tchèque, avait eu un impact négatif sur les relations entre la Russie et l'Occident, ouvrant la voie à un désaccord profond, proche de la confrontation, à propos de la crise du Kosovo. Mais dans les deux cas, Moscou n'a pas eu gain de cause. Tirant les leçons de cet échec, la Russie, sans être favorable à la poursuite de l'élargissement de l'OTAN, a concentré ses efforts sur la candidature des trois États baltes. Poutine a voulu éviter que cette question n'affecte sa politique de rapprochement à l'Ouest, compensant la perspective d'une avancée de l'Alliance vers la Baltique par des succès politiques en Ukraine, en Moldavie et dans d'autres pays de la CEI. Mais, dans le nouveau contexte stratégique ouvert par le 11 septembre, l'enjeu pourrait bien être de faire de la Russie un véritable allié de l'Occident en achevant son integration dans les structures de sécurité de l'après-guerre froide.

Notes:
In the rapidly changing arena of post-Wall geopolitics, NATO has proved to be the most dynamic actor, claiming for itself a significant role in regional security throughout Europe. Regardless of how one might judge NATO in terms of legitimacy, legality and international norms and laws, it has unmistakably overshadowed the OSCE, the UN and the EU in terms of its capacity for assertive action, as witnessed in the Balkans. However, this newly forefronted efficacy is at odds with the nascent post-Cold War security identity of the Russian Federation. Indeed, the new prominence of NATO only underscores its inadequacies as an anchoring-point for Western security architecture. The change in NATO's world prominence has even led to an impoverished awareness of the changing state of Russia. This article presents the new NATO-Russian security picture, analyses its dynamics and presents proposals for reform of the institutional structures concerned. It argues that NATO's ability to fulfil a regionwide security role is questionable under current arrangements. In particular, its exclusive membership policy not only leads to an explicit marginalizing of the Russian Federation, but also puts into question the Alliance's legitimacy as a regional security institution.

Notes:
This article examines the dual problem of Russia's international identity and its integration with the West, looking at it from first the Eastern then the Western side. It argues that a Westernist state identity would be sustainable for Russia only if accompanied by integration with the Euro-Atlantic institutions, and that in some respects the prospects for this are not as bad as usually thought : Russia is in fact in the process of entering most of the minor institutions of the Atlantic system. However, NATO and the EU are the decisive institutions, and here Russia has fared poorly. Neither side conceptualizes NATO in a way that would lead to Russian entry. NATO affirms that Russia is eligible to join when it meets the conditions, but few people on either side believe it : the conditions were conceptualized for including only small countries, not Russia. The inertia of mutual counter-position remains strong. Many in NATO circles have raised a series of objections to ever including Russia, ranging from a visceral belief that NATO needs to have Russia as its external enemy to a more specific fear of a Russian veto power; and NATO has yet to undertake to make its decision-making arrangements more flexible, as would be necessary in order to address the fear of vetoes. In theory the obstacles could be overcome in the present period; in practice this does not seem likely. Presently Russia is instead speaking mainly of uniting with the EU, yet this has even fewer prospects : the EU is too small to take in a large Russia. The failure to find a substantial Western institutional home for Russia has meant, and is likely to continue to mean, undermining the viability of the recurrent attempts at a Westernist identity for Russia.

The promise of constructive NATO-Russia relations remains in jeopardy, prejudiced by friction over the alliance's expansion, its intervention in the Balkans, and Moscow's perception that its interests are being disregarded. On a host of issues, from stability in Europe to the maintenance of effective arms control regimes and management of regional crises beyond the Continent, cooperative working arrangements with Russia are vital. To assure such cooperation NATO should make clear that it is open to Russian membership, priority should go to EU expansion, and the US should pursue joint defenses with Russia against potential ballistic missile threats.

NATO's future is again the subject of speculation and debate despite its having fought a recent and apparently successful war in Kosovo. This article proposes that there are three aspects to this challenge. First, NATO is facing a series of dilemmas in its relations with non-members: how should it manage relations with Russia, and with the applicants for membership? The authors argue that NATO should seek to develop a consolidationist posture. The second challenge is that of developing an EU-NATO partnership in the light of the Helsinki Headline Goals. This, it is proposed, can be developed through a division of labour. The third task, that of military restructuring, is overshadowed by the complexities of processing a working European military structure. In conclusion, the authors suggest that a strategy for the alliance, a key component of the Cold War, but subsequently lost, can be refashioned from the above elements.

Notes:
The fragile relationship between Russia and NATO was dealt a severe blow by differences over Kosovo. But, taking a pragmatic look at how to pick up the pieces, the author argues that their relations have been deeply troubled ever since the Founding Act on Mutual Relations was signed in Paris in 1997. The alliance was perhaps too confident of its ability to admit new members from central Europe, while at the same time consolidating and institutionalising its dialogue with Russia. Russia's leaders were torn between vehement opposition to NATO enlargement and a general willingness to cooperate with the West.

Focusing on relations between NATO and Russia surrounding the Alliance's decision to enlarge, this paper develops a theory of symbolic power that highlights the relationship between identities, narrative structures, institutions, and legitimate action in the construction of security policy. The authors demonstrate that such a theory provides a significant contribution to analysing the role of NATO in post-Cold War security, to understanding the evolution of NATO-Russia relations, to assessing the 'promise' of international institutions as a means of structuring security relations, as well as highlighting forms of power at work in the social construction of 'security communities'.

NATO's air campaign against Yugoslavia precipitated the most dangerous turn in Russian-Western relations since the early 1980s. Although tensions have eased since the end of the Kosovo war, the anger and suspicion engendered on the Russian side will not easily dissipate. The anger will endure not least because the Russian reaction had little to do with the Serb-Kosovar conflict itself, and much more to do with Russia's growing unease about NATO's post-Cold War transformation: its enlargement and pretensions to act beyond the territory of its members without an explicit UN mandate. Repairing relations will require political realism in Russia, the absence of a major new crisis in Kosovo, and restraint from NATO.

Subject(s):
1. NATO--RUSSIA (FEDERATION)
2. NATO--ENLARGEMENT

Notes:
The end of the cold war led to a new European order in which a new security agenda has emerged embracing issues wider than the old military perspectives. NATO has sought to respond to the new order by moving towards concepts of dialogue and cooperation with former opponents in the form of such programmes as Partnership for Peace. The countries of central and eastern Europe, however, have sought full NATO membership as a more concrete guarantee of future security. NATO enlargement became official NATO policy, justified by the idea of promoting stability in central and eastern Europe and as a reflection of NATO's new perception of itself within a post-cold war security architecture. Russian opposition to NATO enlargement has been motivated by fears of NATO exploitation of Russian weakness, loss of strategic positions to NATO and exclusion from Europe. The Founding Act on Mutual Relations was proposed by NATO to overcome Russian concerns and create a new partnership with Russia. Debate has continued within Russia about whether this has actually strengthened Russia's position in its dealings with the West. Fears remain about a further round of NATO expansion into the former Soviet Union which, it is said, would put an end to any existing partnership. Russia is not only redefining its own security agenda in the post-Soviet period but also defining its own broader identity and foreign-policy interests. Western policy makers should not always simply assume that Russia will continue to support a security architecture that primarily accords with the West's agenda.

Notes:
In 1999, the Atlantic Alliance asserted its absolute primacy in European security affairs, successfully reversing ethnic cleansing in Kosovo, admitting three new members from Central Europe and unveiling a New Strategic Doctrine. Yet the challenge of Russia's unremitting opposition to NATO remains. This situation is serious not so much because Russia can threaten Western interests directly, but because of the negative impact that continued confrontation with NATO has on Russia's domestic political evolution. For the West to construct a more cooperative and constructive political and security relationship with Russia, other organisations ought to assume greater prominence—most notably the European Union, but also the UN and the Organisation for Security and Cooperation in Europe. It is also the UN and the West's nor in Russia's interests for NATO to enlarge further eastwards.

Notes:
Dialogue has become a central feature of post-Cold War NATO discourse as well as a concept for theoretical exploration in International Relations. This article explores the role of NATO's dialogue with its former adversaries in constructing post-Cold War security relations in Europe. The theoretical argument builds on two concepts: a 'language of manoeuvre', as used by Hollis and Smith, and the Wittgensteinian notion of being 'entangled' in our language. These insights are applied to an analysis of interactions between NATO, Russia, and the Central Eastern European countries over a six-year period. While accepting that NATO may have had an instrumental goal in encouraging dialogue, once engaged in the process, Alliance manoeuvres, including the decision to expand, were circumscribed and shaped at any given point in time by its entanglement in conflicting promises to others.

Notes:
Russia's signature to the Founding Act, which paved the way for
NATO expansion, was accompanied by continuing misgivings about
Western intentions. Russia, which for decades had pursued the
idea of a pan-European security organisation, continues to view
NATO expansion as unnecessary and seeks instead to strengthen
the OSCE. Reinforcing stability and democracy within its new
member states is one of the motivations for NATO expansion, but
it is the OSCE which is better designed to encourage stability
in these particular states. NATO continues to be seen by Russia
as a military organisation, and its expansion may have damaging
consequences for future Russian-Western relations.

Equivocation by Western governments about the place of Russia in
Europe in the context of the enlargement of NATO and the EU
leaves a critical issue unresolved. In effect, Russia has been
excluded from the Euro-American ambit. Russia's present
weakness has enabled its own reservations about these
developments to be sidelined; but an economically rejuvenated
Russia could pose a threat of dominance in eastern and central
Europe every bit as substantial as the military dominance of
former times. A way needs to be found to incorporate Russia
into a modified European system to avoid its retreating into a
potentially dangerous isolation.

The article compares the results of two model analyses on the implications of NATO enlargement for Russia's security in six regions: North-West, West, South-West, Caucasus, Central Asia, and Far-East. One was done by Vitali Tsygichko using his 'Modes of Defense Sufficiency' (MDS), the other one by these authors using Tsygichko's data as input to the 'Generalized Force Ratio Model' (GEFRAM). While agreeing with regard to the general trend in the development of Russia's security situation, the results differ significantly as to whether these trends indicate a reduction of security below Russia's stated requirements. The results are preliminary and meant as an input to a continued debate on the subject among analysts.

The NATO-Russian Relationship One Year After: Next Steps After First Enlargement?.

Author(s):
1. Isakova, Irina

Subject(s):
1. NATO--RUSSIA (FEDERATION)
2. NATO--ENLARGEMENT

Notes:
Relations between Russia and NATO have been normalised since the signing of the Founding Act between NATO-Russia last year. This opened the way for a permanent Russian mission to NATO, the posting of a military Russian delegation to NATO and a NATO information centre has opened in Moscow. This comes at the same time as NATO is expanding to include some of the states of the former Warsaw Pact. Here, the author looks at how the Russia-NATO relationship can develop in the coming months and years. Although a rapprochement has taken place between the two, their aspirations still differ substantially: while NATO is set on a process of enlargement, the Russians still hope to either persuade NATO to reconsider its 'open door' policy or to stretch the principle to include Russia as well. It is clearly a difficult stage which the relationship has entered. Dr. Isakova argues that the best way forward is to build on existing security arrangements and, if possible, to prolong the period between the first and second waves of enlargement.

Since last year's signing of the Founding Act and creation of the Permanent Joint Council, the NATO-Russia relationship has been raised to a qualitatively new level. Through regular working relations in the PJC, NATO and Russia exchange views and consult on Euro-Atlantic security issues of mutual concern. This political consultation is complemented by military ties, including through joint participation in the SFOR mission in Bosnia and peacekeeping exercises. Ambassador Klaiber argues that, through these cooperative mechanisms, we are heading in the right direction, towards a future of shared security and stability in Europe.

Russia will, he maintains, remain a problem for the West, but its importance and power should not be overemphasized. The danger facing the Western security order is not one of Russia's exclusion but of US power ebbing out of Europe - a distinct probability unless NATO expands.

Notes:
NATO enlargement is a dual imperative, according to the author : it is necessary as an anchor of stability in an uncertain Europe, and it is vital to NATO's own continued existence. However, while NATO enlargement is an essential element of the European equation, so is Russia. If allied leaders intend enlargement as a means to enhance stability on the continent and not as a deterrent against Russia, then Russia's role in European security must be guaranteed through a formal institutional link with NATO, and not just a 'charter'. Only then will it be possible to say that the Alliance has assumed its new role, for its own sake and for the sake of Europe.

The NATO-Russia Founding Act firmly establishes the basis for a permanent security partnership between the two sides, laying to rest the notion that they were forever destined to be adversaries. The signing of the Act, which took place in Paris on 27 May, does not mean that differences of policy or outlook will vanish overnight. But these differences can lessen over time through a process of broad, regular consultations on political and security matters within the newly-created Permanent Joint Council. The main task is to give life to the document by exploiting to the full the new opportunities.

L'Acte fondateur entre l'OTAN et la Russie, signé à Paris le 27 mai 1997 est le texte le plus symbolique de la fin de la guerre froide. L'avenir dira la portée réelle de cet accord pour la sécurité de l'Europe. Elle dépendra à la fois de la volonté occidentale de tirer parti des consultations et des coopérations qu'il prévoit et de la perception que la Russie se fait de ses intérêts de sécurité au prochain siècle. Moscou cherchera probablement tout à la fois à coopérer avec l'Ouest et à transformer l'OTAN en une organisation de sécurité collective de type OSCE. Tels ne sont pas les objectifs des membres de l'OTAN. C'est pourquoi l'ouverture à la Russie doit se faire avec autant de discernement que de détermination, surtout au moment où le désarmement marque le pas à la Douma.

Dans le même temps, le gouvernement russe, favorisant la participation et la coopération dans ses relations avec l'Occident, reévaluant sensiblement ses rapports avec ses anciens satellites, semble signifier qu'il n'envisage pas pour son pays un destin coupé de l'Europe. En étendant leur espace stratégique sans considération démesurée pour la fragilité des équilibres internes en Russie, les Occidentaux ne risquent-ils pas de voir resurgir la logique de confrontation ?

In Russia there is very little sympathy for NATO's eastward enlargement. Everybody is against it and considers it as a threat to Russia. But there are very diverse views about the questions how big such a threat really is and of what it consists, what consequences it could have for Russia and how Moscow should react to NATO's eastward enlargement. All political forces, the general public, the military experts and the political scientists intensively discuss this subject and seek a constructive solution, also taking the ideas of a
strategic partnership with NATO into consideration. What would be useful for Russia and what would better serve the national interests? As to this, there are completely opposing opinions: an extension of NATO to the East would be a threat or would not be a threat at all; Russia would have to react absolutely strongly to this or, on the contrary, would not have to react at all; Moscow's relations to NATO should be suspended or Russia should request NATO membership.

On 27 May 1997, the heads of state and government leaders of the sixteen NATO members and the Russian president Boris Yeltsin signed in Paris the Founding Act on Mutual Relations, Cooperation and Security between the Russian Federation and the North Atlantic Treaty Organisation - NATO-Russia Founding Act for short. Even in the Nineties, during which there has certainly been no lack of historic events, the ceremony at the Elysee can claim special significance, since it puts the relationship between the two main antagonists of past decades on a promising contractual foundation. To a certain extent, this document has also finally put an end to the Cold War, eight years after the fall of the Berlin Wall. However, unlike the Ukraine, which formulated a parallel joint document with NATO (whose designation 'Charter' gives it a slightly lower status in terms of protocol), Russia demonstrates marked restraint with respect to the cooperative possibilities of the relationship of association the Act has formally established.
In this article the author examines the political implications and intentions associated with the NATO-Russia Founding Act.

that there is a national consensus against it. As an issue the
nation can rally around, NATO enlargement serves to shift the
gaze away from Russia's real problems, which are primarily
economic and social in nature. Russia's own interests would be
better served through cooperative engagement with the main
international institutions, including NATO, to meet the new
challenges it faces.

Developing NATO-Russian Relations.
(SURVIVAL, vol. 39, no. 1, Spring 1997, p. 5-18.)
Author(s):
1. Pierre, Andrew J.
2. Trenin, Dmitri
Subject(s):
1. NATO--RUSSIA (FEDERATION)
2. NATO--ENLARGEMENT
Notes:
At its July 1997 summit meeting, NATO plans to invite several
countries to begin negotiations leading to their membership
within a few years. To enlarge the Alliance without a parallel
improvement in NATO-Russian relations could lead to a major and
unnecessary deterioration in West-East relations. It could
empower anti-Western and nationalist elements in Russia;
provoking a retrograde Russian defence policy, including emphasis
on tactical and strategic nuclear weapons; cause Moscow to feel
un constrained by the Conventional Armed Forces in Europe (CFE)
Treaty; and kill the Strategic Arms Reduction Talks (START) II
Treaty. It would be preferable to engage Moscow in a serious
and substantive NATO-Russian charter - a package of measures
including institutionalised political consultations,
modernisation of the CFE Treaty, formal reassurances concerning
the non-deployment of nuclear weapons and foreign forces in new
NATO member-states, enhanced Russian participation in
Partnership for Peace (PfP), and a coordinated response to the
Baltic States. The engagement of Russia would make enlargement
politically acceptable.

La Russie et l'OTAN : une nouvelle etape ?.

Author(s):

Subject(s):
1. NATO--RUSSIA (FEDERATION)
2. NATO--ENLARGEMENT
Notes:
L'auteur decrit, du point de vue russe, le processus qui a abouti
da la conclusion de l'Acte fondateur entre la Russie et l'OTAN
avec pour toile de fond la question de l'elargissement de
l'Alliance atlantique en direction de l'Est et le refus russe
d'envisager une telle perspective. Pour lui, l'opposition
officielle russe a été plus rhétorique que réelle. Moscou s'est efforcée d'effectuer une pression sur les Occidentaux en vue d'obtenir des compensations lors des négociations. Or, les garanties occidentales inclues dans l'Acte fondateur semblent bien floues et, en tout cas, bien éloignées du souhait russe de voir se constituer un système de sécurité collective européen autour de l'OSCE et en dehors de la 'tutelle' américaine.

Russian Domestic Debate on NATO Enlargement: From Phobia to Damage Limitation.

Notes:
This study examines how different Russian foreign policy schools and political groups perceived NATO enlargement. Its purpose is threefold: first, to describe Russian arguments against NATO enlargement circulated in the Russian mass media and research literature. Second, to explain why there was surprising unanimity among the Russian foreign policy schools and political parties as regards NATO extension. Third, to examine specialities of particular schools and parties concerning NATO enlargement.

Russian-NATO Military Cooperation in Bosnia: A Basis for the Future?.

1. Shevtsov, Leontiy P.

Subject(s):

2. NATO—ARMED FORCES—FORMER YUGOSLAVIA

Notes:
The international peacekeeping mission in Bosnia, beginning with last year's Implementation Force (IFOR), which has since been replaced by the Stabilization Force (SFOR), will undoubtedly go down in history as an instance of successful action by the world's community in putting an end to a military conflict. The experience of cooperation between the military contingents of Russia, NATO and other states within the multinational forces in Bosnia-Herzegovina is a reflection of the profound changes in the military and political situation in Europe. This joint operation shows that NATO and Russia can work together and achieve peaceful goals through military cooperation. Although the author argues that NATO's enlargement remains the chief obstacle to broader cooperation, he is hopeful for the future of NATO-Russia relations.

Mag Rusland ooit lid van de NAVO worden?.

Author(s):
1. Siccama, J. G.

Subject(s):
1. NATO--ENLARGEMENT
2. NATO--RUSSIA (FEDERATION)

Notes:
The author blames the present objections of Russia to NATO enlargement on the delay in Western decision-making after the end of the Cold War. He prefers gradual enlargement, doing justice to the wish of the Central Europeans to become integrated militarily, to a division of Europe in spheres of influence. While it is not advisable to exclude Russia from NATO membership, the envisaged Charter between Moscow and the Alliance should not be allowed to undermine the political and military effectiveness of the West.

Subject(s):

2. NATO--ENLARGEMENT

Notes:
The results of the December 1993 legislative elections in Russia and the January 1994 NATO summit marked a turning point in Moscow's attitude vis-a-vis the Atlantic Alliance. The main point of contention was of course NATO's decision to enlarge. From Russia's point of view, the expansion of NATO will divide Europe, goes against the principle of joint security, and increases instability. Despite the signature of a bilateral charter with Russia, the debate will be kept alive.

The author discusses here the ways and means by which the UK can contribute to Russia's integration into economic and security structures, in particular NATO, the OSCE and the Council of Europe. He concludes that Russia has a central role in the future of a secure Europe and although the West must maintain its vigilance in these times of uncertainty, we must also continue to build towards the fundamental success of Russian renewal.

2. NATO--RUSSIA (FEDERATION)

Notes:
The purpose here is to examine whether a plausible Russian alternative, or at least necessary complement, to NATO enlargement exists that the West should seriously consider so as to minimize the risks of a 'cold peace' and enhance the prospects for a functional non-exclusionary security regime whose time, despite a discouraging history, perhaps might have come.

Notes:
The conditions that made NATO a successful Cold War alliance have now disappeared, leading some to argue that NATO should expand eastward, serving as the focal point for post-Cold War European security. But this optimism may be out of place. The predicted transformation of NATO from a military to a political alliance has not occurred. More importantly, since NATO's strategy has a nuclear component, NATO expansion would presumably include extending the nuclear umbrella to new members in Central Europe. Such a move might be perceived as unnecessarily provocative to Russia. The implications and potential consequences of NATO expansion must be fully taken into account by NATO's leadership.

Avoiding a New Confrontation with NATO.

Subject(s):

2. NATO--ENLARGEMENT
Notes:
The author, maintaining that relations between Russia and the West have been stalemated in recent years over the question of NATO's expansion, suggests that it is high time that Russia and the West developed a new relationship; the peacekeeping operation in Bosnia demonstrates that practical cooperation is possible and this could lead to a true partnership. He proposes that the thorny question of Central European countries eventually joining the Alliance should be put on hold for the time-being, and NATO should concentrate on promoting cooperation with is Eastern partners under individual programmes. An enlarged NATO could not be a substitute for a new European security order as it would exclude Russia. NATO-Russia cooperation, however, could provide the linchpin for such a system.
