Notes:
Selected papers from a conference organized in Spring, 2006, by the Machiavelli Center for Cold War Studies (CIMA) and the Cold War International History Project.
'This edited volume is the first detailed exploration of the crisis of detente in Europe in the late 1970s and early 1980s. The transition from detente to a new phase of harsh confrontation and severe crises is an interesting, indeed crucial, phase of the evolution of the international system. This book makes use of previously unreleased archival material, moving beyond existing interpretations of this period by challenging the traditional bipolar paradigm that focuses mostly on the role of the superpowers in the transformation of the international system. The essays emphasize the combination and the interplay of a large number of variables - political, ideological, economic, and military - and explore the topic from a truly international perspective. Issues covered include human rights, the euromissiles, the Conference on Security and Cooperation in Europe (CSCE), the Revolution in Military Affairs, the transformation of the international economy, eurocommunism, and European integration.'

'Twenty-five years ago, in the early 1980s, no one could have imagined that only a decade later the cold war would be over. How did it happen? The essays in this collection offer illuminating insights into the key players - Ronald Reagan, Mikhail Gorbachev, Boris Yeltsin, and others - and the monumental events that led to the collapse of communism. The expert contributors examine the end of detente and the beginning of the new phase of the cold war in the early 1980s, Reagan's radical new strategies aimed at changing Soviet behavior, the peaceful democratic revolutions in Poland and Hungary, the events that brought about the reunification of Germany, the role of events in Third World countries, the critical contributions of Gorbachev and Yeltsin, and more.'

Europe and the End of the Cold War : A Reappraisal - Abingdon, UK : Routledge.
xiv, 288 p.; 24 cm.
(Cold War History Series ; 19)
ISBN: 9780415449038
Subject(s):
1. COLD WAR
Notes:
'This book seeks to reassess the role of Europe in the end of the Cold War and the process of German unification. Much of the existing literature on the end of the Cold War has focused primarily on the role of the superpowers and on that of the US in particular. This edited volume seeks to redirect the focus towards the role of European actors and the importance of European processes, most notably that of integration. Written by leading experts in the field, and making use of newly
available source material, the book explores 'Europe' in all its various dimensions, bringing to the forefront of historical research previously neglected actors and processes. These include key European nations, endemic evolutions in the Soviet Union and Eastern Europe, European integration, and the pan-European process. The volume serves therefore to rediscover the transformation of 1989-90 as a European event, deeply influenced by European actors, and of great significance for the subsequent evolution of the continent.'

3. INTERNATIONAL RELATIONS
Added entry(s):
1. Loth, Wilfried, ed.
2. Soutou, George-Henri, ed.
Notes:
Includes index.
'The ten years from 1965 to 1975 marked a deep transformation of the Cold War. Western Europe began to participate in the shaping of detente, whereas in Eastern Europe ferments began to establish themselves that would ultimately lead to the astounding changes of 1989-1990. Based on recent archival research, this book provides important, new insights, particularly on German views about a new European security system, on the British and French views that were instrumental in the creation of the 'Third Basket' of the Helsinki Agreement and on Washington's concern about the German Ostpolitik. This book also contains new evidence about the decision-making process inside the Warsaw Pact, which reveals it to be more complex than previously thought. This process included pressure for detente from East European countries and a striving for detente as a means to reform the Soviet system. For the first time, the emergence of the new structure of compromise that led to the ending of the Cold War is explained on the basis of inside accounts.'

(Cold War History Series ; 16)
ISBN: 9780415421096
Subject(s):
1. EUROPEAN INTEGRATION--HISTORY
2. COLD WAR
3. DETENTE
Added entry(s):
1. Ludlow, N. Piers, 1968- , ed.
Notes:
'Post-war Europe was deeply affected by both the Cold War and European integration. All too often the two processes have been studied entirely separately, however. This edited volume therefore brings together contributions from prominent historians in both of these fields. What emerges is the way in which the East-West conflict and the emergence of organised cooperation in Europe did become entangled with one another, despite the attempts of some governments deliberately to avoid any interplay between the two. The period covered is one of major change in Western Europe involving both de Gaulle's rebellion against the structures of Atlantic and European cooperation and Brandt's radical new Ostpolitik. It was also a time when the British debate about how to define their world role involved calculations about both their approach to NATO and the EEC. From 1969 onward these changes had also to be carried out against the backdrop of the American foreign policy of Nixon and Kissinger.'

A Failed Empire : The Soviet Union in the Cold War from Stalin to Gorbachev - Chapel Hill : University of North Carolina Press.
xvi, 467 p. : ill.; 25 cm.
(The New Cold War History)
ISBN: 9780807830987

Author(s):
1. Zubok, Vladislav Martinovich

Subject(s):
1. USSR--FOREIGN RELATIONS
2. USSR--POLITICS AND GOVERNMENT
3. COLD WAR

Notes:

'Western interpretations of the Cold War have erred by exaggerating either the Kremlin's pragmatism or its aggressiveness, argues the author. Explaining the interests, aspirations, illusions, fears, and misperceptions of the Kremlin leaders and Soviet elites, he offers a Soviet perspective on the greatest standoff of the twentieth century. Using recently declassified Politburo records, ciphered telegrams, diaries, and taped conversations, among other sources, the author discovers that security and power were the primary objectives for Stalin and his successors. Yet he also finds that Soviet leaders were hobbled by ideological dogmas and domestic weaknesses, an increasingly disillusioned society, and a malfunctioning economy. The author argues that American strategies of containment during the 1950s and the 1980s only reinforced the elements of belligerence in Soviet behavior. Offering original interpretations of Soviet international behavior for each period of the Cold War, the author explores Stalin's blunders in Germany and Korea as well as his underestimation of American global activism, Khrushchev's contradictory attempts to enforce peace by nuclear brinkmanship, the surprising story of Brezhnev's passion for detente, and Gorbachev's destruction of the Soviet superpower as the by-product of his hasty steps to end the Cold War and reform the Soviet Union. A revolutionary Marxist-Leninist ideology, geopolitical interests emerging from World War II, the personal experiences of leaders, fierce party politics, and changes in society and culture were all factors in shaping an ideologically driven Soviet international policy, the author argues.'

ID number: 80021753
Year: 2007
Author(s):
1. Kennedy-Pipe, Caroline
Subject(s):
1. COLD WAR
2. INTERNATIONAL RELATIONS
Notes:
'The Cold War saw the two great powers of the twentieth century locked in conflict and the world divided along ideological lines. What were the events which caused this state of affairs? What role did the leaders of the time - Roosevelt, Stalin, Churchill - play? What lessons might be drawn from the genesis of that conflict for our own increasingly fraught and anxious times? The author provides a lively and authoritative account of the origins of the Cold War, looking first to its roots in the impact of the Russian Revolution and tracing its evolution through to its physical embodiment in the Berlin Wall. She explores the emergence of the competition between Russia and the United States and argues that the Cold War was not a confrontation that anyone sought but one that arose from a complex interplay of factors. Looking at the clash of ideas and personalities that characterized this period, she argues that studying the struggle with communism provides important insights into current international relations and the battle of ideas with radical terrorism.'

3. DETENTE
4. GERMAN REUNIFICATION QUESTION (1949-1990)
Notes:
Bibliography: p. 218-244. Includes index.
'This book examines British policy towards the German Question and detente during a crucial period in Cold War history, and draws on unpublished British and American archives. British policy strove for both good relations with West Germany and detente with the Soviet Union. West Germany's hard line towards the Soviet bloc and the issue of German unification was a permanent source of East-West tension during this period. This policy was initially endorsed by the United States, and these factors cast British policy onto the horns of a dilemma. On the one hand, the quest for a detente required recognition of the status quo in Central and Eastern Europe; on the other, close relations with West Germany required at least minimal support for the revisionist aims of Bonn's Ostpolitik ('Eastern policy'). It was not until the United States revised its approach towards the German Question that this stumbling block to detente was
removed. But it took some time for British policy-makers to accept the reduced role that Britain could play on the international stage.'

6. BRANDT, WILLY, 1913-
7. KENNEDY, JOHN FITZGERALD, 1917-1963
Notes:
'This book examines the key relationship between Willy Brandt (then Mayor of West Berlin and later West German Chancellor) and the administration of President John F. Kennedy. The author focuses on the administration's influence on the development of Brandt's 'policy of small steps' and the formation of his later Ostpolitik, the centrepiece of European detente. Brandt's interaction with the Kennedy administration is traced through the Berlin Wall crisis of 1961, Kennedy's search for a modus vivendi based on the status quo, the 1962 crisis in German-American relations, the development of his programmatic statements, Brandt's three meetings with the President including Kennedy's famous visit to Berlin, the limited nuclear test ban treaty and Brandt's Berlin pass agreement of Christmas 1963. While the narrative focuses on the gradual change in Brandt's position, systematic parts concentrate on Brandt's and Kennedy's detente concepts, the triangular relationship between West Berlin, Washington and Bonn, with its implications for domestic politics, and on the role of images, campaigning and public opinion.'

2. STATESMEN--USA--BIOGRAPHY
3. USA--FOREIGN RELATIONS
4. COLD WAR
Notes:
Includes index.
'Dean Acheson was one of the most influential Secretaries of State in US history, presiding over American foreign policy during
the pivotal decade after World War II. During his vastly influential career, Acheson spearheaded the greatest foreign policy achievements in modern times, ranging from the Marshall Plan to the establishment of NATO. In a book filled with insight based on research in government archives, memoirs, letters, and diaries, the author illuminates Acheson's policy-making, describing how he led the State Department and managed his relationship with Truman. The book examines Acheson's major triumphs, including the highly underrated achievement of converting West Germany and Japan from mortal enemies to prized allies, and does not shy away from examining his missteps. But underlying all his actions, the author shows, was a tough-minded determination to outmatch the strength of the Soviet bloc--indeed, to defeat the Soviet Union at every turn.'
For half a century, the United States and the Soviet Union were in conflict. But how and where did the Cold War begin? The author answers these intriguing questions in this book. He argues that the intergenerational crisis over Iranian Azerbaijan (1945-1946) was the first event that brought the Soviet Union to a confrontation with the United States and Britain after the period of cooperation between them during World War II. Based on top-secret archive materials from Soviet and Azerbaijani archives as well as documents from American, British, and Iranian sources, the book details Iranian Azerbaijan's independence movement, which was backed by the USSR, the Soviet struggle for oil in Iran, and the American and British reactions to these events. These events were the starting point of the longer historical period of unarmed conflict between the Soviets and the West that is now known as the Cold War.

1. WORLD WAR, 1939-1945--DIPLOMATIC HISTORY
2. GREAT BRITAIN--FOREIGN RELATIONS--USA
3. USA--FOREIGN RELATIONS--GREAT BRITAIN
Notes:
Includes index.
'The 1940s was the most dramatic and decisive decade of the 20th century. This volume explores the Second World War and the origins of the Cold War from the vantage point of two of the great powers of that era, Britain and the US, and through the eyes of their wartime leaders, Churchill and Roosevelt. It also looks as their chequered relations with Stalin's Russia and at how the Grand Alliance crumbled into an undesired Cold War. But this is not simply a story of top-level diplomacy. The author explores the social and cultural implications of the wartime Anglo-American alliance, particularly the impact of nearly three million GIs on British life, and reflects more generally on the importance of cultural issues in the study of international history. The book persistently challenges popular stereotypes - for instance on Churchill in 1940 or his Iron Curtain speech in 1946. It probes cliches such as 'the special relationship' and even 'the Second World War'. And it offers new views of the familiar, such as the Fall of France in 1940 or Franklin Roosevelt as 'the wheel-chair president'.

'The history of the Cold War is being re-written according to the newly available sources. But first and foremost, it needs to be re-conceptualized and framed within the broader historical context.
context that transformed the Cold War from the 1960s onwards, altered the very dynamics of bipolarism, and eventually brought it to its end. The long duration and the unexpectedly peaceful ending of the Cold War call for new viewpoints that transcend the established paradigms about its inception. Historians ought to address all those transformations in the international economy, in the networks of interdependence linking together new areas - especially in Asia - and in the ensuing cultural images that gradually narrowed the relevance of bipolarism. Thus the habitual diplomatic and security themes must be enjoined with economic, ideological, technological and cultural ones. Here a distinguished group of international history specialists discusses the complex relationship between Cold War dynamics, the globalizing of capitalism, and the demise of Soviet Communism. Their controversial and conflicting views, as well as their multidisciplinary approaches, highlight the various factors that constituted (and did not constitute) the Cold War. Thus they help to redefine the concept itself, to map its values and limitations, and to propel historical debate onto new grounds.'

"The 1980s witnessed one of the most dramatic and far-reaching transformations of world politics in modern times. Not only did the Cold War end, with the unexpected collapse of one-party
communist rule in eastern Europe and the former Soviet Union, but the early 1980s was also a period of almost unprecedented rivalry and tension between the two main actors in the East-West conflict, the United States and the Soviet Union. Why and how that conflict first escalated and thereafter, in an amazingly swift process, was reversed and brought to its peaceful conclusion, at the end of the decade, is the topic of this volume. With individual contributions by 18 well-known scholars of international relations and history from various countries, the book addresses the role of the United States, the former Soviet Union, and the countries of western and eastern Europe in that remarkable last decade of the Cold War, and discusses how particular events as well as underlying political, ideological, social, and economic factors may have contributed to the remarkable transformation that took place.'
2. German Historical Institute (US)

Notes:
Includes index.
'The close association between the United States and the Federal Republic of Germany was a key element in the international order of the Cold War era. No country had as wide-reaching or as profound an impact on the western portion of divided Germany as the United States. No country better exemplified the East-West conflict in American thinking than Germany. This book examines all facets of German-American relations and interaction in the decades from the defeat of the Third Reich to Germany's reunification in 1990. In addition to its comprehensive treatment of US-West German political, economic, social and cultural ties, it also provides an overview of the more limited dealings between the United States and the communist German Democratic Republic.'

La tache rouge : le roman de la guerre froide - Paris : Editions de La Martiniere.
559 p. : ill.; 24 cm.
ISBN: 2846751390
Author(s):
1. Fontaine, Andre, 1921-
Subject(s):
1. COLD WAR
Notes:
Includes index.
'A la lumiere des nombreuses revelations intervenues depuis la dislocation de l'URSS, ce livre raconte les origines et les grandes etapes de ce qui aura ete en fin de compte la troisieme guerre mondiale. Une guerre que l'on a appelee 'froide' parce que la crainte de l'apocalypse a permis, parfois a la derniere seconde, comme dans la crise des fusees de Cuba, de trouver des portes de sortie a toutes les dramatiques 'parties au bord du
gouffre' qui l'ont jalonne. De la Corée à la Caraïbe en passant par le Vietnam, l'Afghanistan, l'Ethiopie et l'Afrique ex-portugaise, elle n'en a pas moins fait plus de morts que toutes les autres guerres de l'Histoire, à l'exception de celle de 39-45. Et elle a entraîné une demente course aux armements. À plusieurs reprises, le recours aux armes nucléaires a eu nombre d'avocats à l'Ouest, et Mao envisageait d'un cœur léger un conflit atomique qui aurait pu anéantir 'la moitié de la population du monde' pour assurer la victoire finale du socialisme.'
government backing arrived. However, once the state became involved, financial and logistical support was used to ensure that a certain sanctioned 'line' was followed. The book, which includes contributions from a range of European and American scholars, offers an important cross-section of case studies that highlight these connections between overt/covert activities and cultural/political agendas in Western Europe between 1945 and 1960. While these studies predominantly focus on the broad range of American influence in Western Europe, they also demonstrate the mix of American and European interests that were being expressed and which often produced varied and sometimes unintended results.'

Subject(s):
1. INTERNATIONAL RELATIONS
2. COLD WAR
3. POST-COMMUNISM
4. WORLD POLITICS

Notes:
'Tracing the evolution of international relations since the onset of the Cold War, the authors draw on recently available archival resources to vividly narrate world affairs from 1945 to the present. Events are addressed chronologically, with attention to both their motivations and their significance. The focus is on issues of security in the very broadest sense, ranging from politics and economics to ecological and social problems. A distinctive feature of the text is the clear, concise explanation of the key theories and concepts of international relations, supplemented by an extensive glossary.'

1. COLD WAR
2. MILITARY HISTORY, MODERN--20TH CENTURY
Notes:
'From 1949 to 1991 the world was overshadowed by the Cold War.
Repeatedly it seemed that in days, even hours, global nuclear
conflict would sweep away much of the United States, the Soviet
Union and Europe. They would be obliterated in what President
Carter described as 'one long, final and very bleak afternoon'.
When the Cold War ended, the Warsaw Pact was wound up and the
vast military forces which had flourished for over forty years
were disbanded. As with all wars, however, it was only then
that the realities of what had been involved began to emerge;
indeed, much has remained hidden until now. In this book, the
author discloses not only the vast scope of the military
resources involved, but also how nearly threat came to terrible
reality. Most chillingly of all, he reveals that while the
menace of nuclear war predominated, it was actually little
understood even by the experts. The book examines each military
area in turn, covering the formation of the two great
alliances, and the strategies and major weapons in the rival
navies, armies and air forces. That the Cold War ended without
a conflict was due to professionalism on both sides.'

'This book is about the propaganda war between the Communists and the West, a war that the Communists were determined to win. It is based on first-hand interviews and hitherto unpublished documents from the Central Committee of the Soviet Communist Party. The author shows that Western radio was an unrivalled force in the fight against Communism and the fall of the Iron Curtain. The Communists did everything in their power to prevent the infiltration of Western thought into their world, resorting to jamming radio signals, assassinating staff and bombing radio stations. They decided to stop the mass production of short-wave radios so that their citizens could not hear Western broadcasts. The book reveals that due to administrative incompetence, short-wave radio production carried on, necessitating continued expenditure of billions of dollars on jamming transmissions. The Western broadcasts introduced a forbidden, exciting culture to millions of eager listeners in the Soviet bloc. Pop music, talk shows, news and information about consumer goods all relayed a message of the good life, undermining subtly the values of the Communist regime. Western radio presented the concept of a society that upheld basic human values; it connected listeners with the cultures of Europe and North America.'

This work analyses Soviet motives for ending the cold war and examines how Moscow has come to terms with its much reduced status in the post-cold war world. The book shows that the reasons Gorbachev chose to transform relations with the West varied over time and across issue areas. A multifaceted explanation is provided which is unique in giving equal space to both internal and external determinants of foreign policy. The book then goes on to describe how the hopes for a New World Order met with disappointment and disillusionment in both Moscow and Washington. Russia is usually blamed for the downturn in relations, but this is shown to be a simplistic view. Clearly, Russia remains highly unstable at home, and its authoritarian instincts were starkly revealed in Chechnya. However, this book shows that Moscow's foreign policy has generally been conducted within the parameters of international consensus even when this meant the abandonment of long-time allies, such as Iraq and the Bosnian Serbs.

The relationship between the Soviet Union and the United States at the end of the 1970s was dominated by a series of conflicts over arms control issues and interventions in the Third World. In the end, the sum of these conflicts destroyed the framework of relaxation of superpower tension known as detente and ushered in a period of renewed Cold War rivalry in the early 1980s. This volume contains a number of interpretative essays from leading Cold War historians as well as some of the more important documents from American and East Bloc archives. It centers on the SALT II negotiations, on conflicts in Africa, the Middle East, and Afghanistan, and on bilateral issues, such as trade and human rights.

From the Shadows : The Ultimate Insider's Story of Five Presidents and How They Won the Cold War - New York : Simon & Schuster.
604 p. : ill.; 25 cm.
ISBN: 0684810816
Author(s):
1. Gates, Robert M.
Subject(s):
1. USA--FOREIGN RELATIONS--USSR
2. USSR--FOREIGN RELATIONS--USA
3. INTELLIGENCE SERVICE--USA
Notes:
Includes index.
'Drawing on his personal experiences in the CIA and on the National Security Council staff in the White House, as well as on intimate knowledge of CIA documents and activities never before revealed, Gates tells how the Cold War was really fought. From Nixon's detente policy to Reagan's arming of the Mujahedin in their war against the Soviets in Afghanistan, he tells the true story of American policy toward the Soviet Union, placing special emphasis on the White House and the CIA. Gates shows that, contrary to conventional wisdom, there was extraordinary continuity of policy from one President to the next, most strikingly from Carter to Reagan. Woven throughout this story are vivid descriptions of the atmosphere, culture and politics of the CIA and the White House. In addition, Gates provides candid appraisals of Presidents from Nixon to Bush, and of the key officials who advised them or toiled in the shadows.'

Notes:
  Bibliography: p. 529-547. Includes index.
  'How was the Cold War in Europe won, and what are the policy
lessons for the future? This question was debated during the
US presidential election campaign in 1992, and it seems likely
to be argued about for many years to come. Covering the Cold
War from start to finish, this study helps provide an answer
through the vehicle of an in-depth political and military
analysis. It offers a penetrating assessment of how the western
alliance mastered the difficult art of coalition partnership
and thereby played a critical role in shaping the outcome. It
then addresses the looming issue of whether alliance
partnership can be carried forward in an era that promises to
offer serious but far more ambiguous challenges than faced
during the Cold War.'

Un grand malentendu ? : une histoire de la guerre froide (1917-1990) -

'The author presents here an extraordinary picture of the world as
the former Allies of World War II broke asunder, and as the
nuclear age dawned. He opens by describing Soviet Russia in
1945, drawing in upon herself and yet seeking to possess vast
territories. He proceeds to discuss the political and economic
situations in the disputed lands of Eastern Europe - Greece,
Finland, Turkey, Germany and Austria - and of the Far East; and
to define the strength of Communism and anti-Communism in
France, Italy and Spain. In the West, he analyzes a new world,
bered of Roosevelt and Churchill, governed now by Truman and
Attlee, a world in which the United States is dominant and
Britain, on the point of giving up an empire and economically
bankrupt, a fading force. The book ends with the crisis in
Persia in March 1946 which nearly hurled the world into a
third, cataclysmic, global conflict.'

Notes:
  'By examining the foreign policy reports of general secretaries to
  their party congresses since 1969, the author identifies three
different views among the ruling Communist parties as to what
detente actually means. He argues that whereas public attention
has been focused on detente with the Soviet Union and the People's
Republic of China, more might be achieved if the United States
reexamined its relations with some of the smaller ruling Communist
parties, notably Yugoslavia and Romania, and secondarily Hungary,
Poland and Czechoslovakia.'

Defence in the Cold War: The Task for the Free World - London : Royal
Institute of International Affairs.
viii, 123 p. : ill. ; 22 cm.
Subject(s):
1. COLD WAR
2. MILITARY POLICY
Added entry(s):
1. Royal Institute of International Affairs (GB)
Notes:
'What is the Cold War that Stalin is waging? What is the free
world doing against it? Are we to expect another Korea in the
struggle of ideas and systems now going on everywhere? What forces
are needed if the Atlantic Pact is to prevent war? These are some of
the questions discussed in this Report - a document which is more critical
and far-reaching than anything yet published in Britain on the subject
of defence.'

1997

The Cold War and Soviet Military Strategy.
Author(s):
1. Cimbala, Stephen J.
Subject(s):
1. USSR--STRATEGIC ASPECTS
Notes:
The author here discusses several of the more important issues in the development of Soviet military strategy between the end of World War II and 1991 by selective focus upon salient conceptual and operational problems that Soviet, and also NATO, leaders had to resolve. The problems of choice were those involving: (1) the nature of surprise and deception in military strategy; (2) the role of nuclear escalation in relation to the anticipation of surprise attack and the avoidance of inadvertent war; (3) the transition in Soviet assessment of the significance of the defensive and its relationship to new technologies and concepts about conventional deterrence; and (4) confrontation with the revolution in military affairs in past Soviet, and in future Russian, military planning.
ID Number: JA012909
Year: 1997

Eurocommunism and Detente.
(SURVIVAL, vol. 19, no. 6, November - December 1977, p. 251-254.)
Author(s):
1. Hassner, Pierre
Subject(s):
1. EUROCOMMUNISM
Notes:
There is a race on in Europe today between integration in the West, disintegration in the East, and rapprochement between East and West. In this situation the key to the decline or revival of Europe as a whole is the strengthening and opening of Western Europe to Eastern Europe.
