Bibliography: p. 190-207. Includes index.

'This book explores the common ground between Russia and NATO and the potential to move beyond cultural differences. The author demonstrates how cooperative security could serve as a means to bridge the gap between two supposedly antagonistic entities: NATO and Russia. He shows that by building confidence between the two parties about each other's intentions, cooperative security can regulate attitudes that might otherwise lead to misperception. The author focuses on the peculiarity of NATO-Russia relations and emphasises the Russian approach to analyse them. Three parts articulate his work: the definition of the Russian identity, Russia's attitude to NATO, and the question of cooperation in Russia-NATO relations. The analysis of the Russian identity sheds some light on what happened to this relationship in the past several years and offers some appropriate lessons for consideration. Difficulties that arose after the demise of the Soviet Union up until the creation of the NATO-Russia Council in 2002 are also stressed and interpreted. Last but not least, the importance of cooperation between Russia and NATO is highlighted and the author puts forward some ideas for easing major points of friction between the two parties.'

'Reussia's policy towards the enlarged European Union and NATO is changing in ways that reflect its growing self-reliance under President Putin. But Russia continues to seek engagement in Europe. There are serious choices to be made on both sides about the obstacles to good relations and the policies to enable a form of Russian 'inclusion without membership'. In this book, which draws on extensive interviews with Russian decision-makers as well as a body of new survey evidence, official sources and recent published debates, the authors examine recent changes in Russia's relations with the EU and NATO and explore the patterns of support for these various orientations among its own elites and public. A final chapter anticipates the issues that will become increasingly prominent, including competition in the 'common neighbourhood' and controversy over the role of values in shaping Russia's future position in Europe.

'Since the re-emergence of Russia as an independent state in December 1991, debates and controversies surrounding its evolving relations with NATO have been a prominent feature of the European security scene. This is the first detailed and comprehensive book-length analysis of Russia-NATO relations, covering the years 1991-2005. This new volume investigates the nature and substance of the 'partnership' relations that have developed between Russia and NATO during this time. It looks at the impact that the Kosovo crisis, September 11th, the Iraq war and the creation of the NATO-Russia Council have had on this complex relationship. The author concludes that Russia and NATO have, so far, developed a pragmatic partnership, but one that may potentially develop into a more significant strategic partnership.'

'The CSIS Eastern Europe Project is engaged in the transformation process in several parts of Central and Southeast Europe. The project is additionally engaged in an ongoing analysis of broader political trends encompassing 20 states and aspiring states in Eastern Europe, including the political and security impact of NATO and European Union enlargement. The Eastern Europe Project launched an innovative initiative on the extensive debate on NATO's evolution. The initiative began shortly after NATO's Washington summit in April 1999, which was held at a critical time, in the middle of NATO's first military campaign against Serbia, and in the midst of major decisions on alliance enlargement and NATO's evolving mission in a new security environment. The CSIS initiative on NATO's evolution was designed to address the question of enlargement and institutional adaptation by promoting dialogue and informed decisionmaking on issues essential to US national interests and European security. This guide provides an overview of the ongoing debate through condensed descriptions outlining the key
The new agreements between NATO and Russia and between the United States and Russia create opportunities for strengthening bilateral and multilateral military activities throughout the former Soviet Union. These could embrace all the militaries of the former Soviet Union and not only enhance military security in the Commonwealth of Independent States (CIS), but also foster military-political integration with the West and possibly defense reform in all or at least some of the CIS regimes. Most importantly, Russia is pledged to cooperate in these activities. This monograph explores the unprecedented opportunities that are now before the United States and recommends actions that the Government and armed forces, especially, but not only the US Army, should undertake to consolidate and extend the newly emerging military partnership and cooperative security regime that are now developing. Because the opportunities being presented to the United States and NATO were never possible before to this degree, the proper way to exploit them will become a subject of debate.

Russia Faces NATO Expansion : Bearing Gifts or Bearing Arms ? - Lanham,

Bibliography: p. 245-251. Includes index.

'The immediate and long-term importance of Russian thinking about
NATO expansion eastward has been badly underestimated in the
West. Indeed, most Western analysis has striven to provide
justification for the West's policy of enlarging the alliance
rather than examining its potential drawbacks. Although the
NATO issue has been articulated primarily by the Russian elite,
it has manifested itself in a rising reservoir of ill-will
toward the West that cannot be ignored. In this book the author
seeks to remedy that oversight by a thorough examination of
Russian official statements, expert analysis, party platforms,
and media commentary. Taken together, they show the degree to
which NATO expansion has brought a rare unity to the otherwise
fragmented and volatile Russian political arena. The author
first provides a detailed account of Russian reactions to
NATO's plans since the early 1990s. He then analyzes how the
NATO question shapes Russian strategic thinking, military
reforms, and election campaigning, and how it affects Moscow's
relationship with Ukraine, the Baltic States, China, and the
CIS. Crises in Yugoslavia and Iraq are used as case studies.
Based entirely on Russian-language sources, this timely study
provides invaluable insights into current Russian thinking on
NATO expansion and projects the significance of such thinking
for the Western Alliance into the future.'

Notes:
'NATO's enlargement has brought it to the borders of the Baltic States who covet membership in NATO. However, admitting them into NATO is one of the most difficult problems for the Alliance because of Russia's unconditional opposition to such action and because of NATO's own internal divisions on this issue. Nonetheless, a new regime or system of security for the entire Baltic region must now be on the US and European agenda. The key players in such a process are Russia, Germany, and the United States. Their actions will determine the limits of the possible in constructing Baltic security for the foreseeable future. In this study, Dr. Blank presents a detailed and extensive analysis of these three governments' views on Baltic and European security. Their views on regional security are materially shaped by and influence their larger views on their mutual relations and policy towards Europe. Their views also demonstrate the complexity of the issues involved in constructing Baltic, not to mention European, security. But
because NATO enlargement is the most serious foreign policy and defense issue before Congress now, such an analysis can illuminate much of what is happening in the NATO enlargement process and why it has taken its current shape.'

Notes:
Relations between Russia, Ukraine and Belarus and NATO have placed more emphasis on cooperation than confrontation since the Cold War, and Ukraine has begun to move towards membership. At the popular level, on the evidence of national surveys in 2004 and 2005, NATO continues to be perceived as a significant threat, but in Russia and Ukraine it comes behind the United States (in Belarus the numbers are similar). There are few socioeconomic predictors of support for NATO membership that are significant across all three countries, but there are wide differences by region, and by attitudinal variables such as support for a market economy and for EU membership. The relationship between popular attitudes and foreign policy is normally a distant one; but in Ukraine NATO membership will require public support in a referendum, and in all three cases public attitudes and foreign policy issues can influence foreign policy in other ways, including the composition of parliamentary committees. In newly independent states whose international allegiances are still evolving, the associations between public opinion and foreign and security policy may often be closer than in the established democracies.

Russia's Relationship with NATO : A Qualitative Change or Old Wine in New Bottles ?.

Notes:
Since the establishment of the NATO-Russia Council in 2002, new opportunities have arisen for developing a different relationship from what existed in the past. Are NATO and Russia now partners in fighting common threats like global terrorism ? There is a common view that the relationship has improved but no detailed analysis of how the relationship has changed and no agreement on whether the change is going to be fundamental.

Because previous attempts by NATO to engage Russia have failed, scepticism is widespread. In fact, Russia's current view of NATO consists of contradictory elements and shows puzzlement about NATO's role and transformation in the post-Cold War world. Although the partnership is not always going to be smooth, Russia will prefer collaboration over confrontation.

NATO-Russia Relations: Present and Future.

Author(s):
1. Polikanov, Dmitry
Subject(s):
1. NATO--RUSSIA (FEDERATION)
Notes:
NATO relations with Russia have seemed to develop in ups and downs throughout their entire history. But even at the stages of cooperation they have followed the 'one step forward, two steps back' formula. Moscow's relations with the alliance have always been hostage to inner processes of transformation of both parties, the micro-vectors of which have not necessarily coincided all the time. This article analyses the principal differences between Russia and NATO in the recent past and lessons learnt from these contradictions. It then characterizes the current status of relations and the impediments to deeper cooperation, including lack of trust and interoperability. As for the future, the author maintains that NATO-Russia relations have reached a certain ceiling and may stay like this for years, unless the parties break through this roof of inherited insults, lack of confidence, complacency and obsession with their own inner developments. Only this will help them to meet together the security challenges of the twenty-first century.

1. Zwack, Peter B.
Subject(s):
1. NATO--RUSSIA (FEDERATION)
Notes:
The author advocates the establishment of a combined NATO and Russian military force to meet the challenges of the post-9/11 world. He cites the continuing threat of transnational terrorism and the proliferation of weapons of mass destruction to call for a NATO-Russian force based on the 'NATO-Russia Contingency Command' first suggested in 1996. The author analyzes and refutes each of the many arguments against the establishment of such a force and determines that now is the time for NATO and Russia to take the next major military step in their maturing relationship: the establishment of a NATO-Russia Contingency Command based in Russia.

11 September 2001. This date has already entered international parlance as a single set of numbers that needs no further explanation: '9-11'. The shock to the United States was also a shock to the international system, to a degree and in a way that is still not entirely apparent. One immediate result of 11 September was a change in Russian policy toward the United States and - eventually - to NATO. This change, which is described and analyzed in this article, may prove to be only tactical - a set of moves by Russian President Vladimir Putin to take advantage of circumstances; or it may prove to be of strategic significance: presaging a more lasting Russian engagement with the West, its powers, and its institutions. To assess the possibility of such a more lasting engagement, it is first necessary to understand what has happened in Russia's relationship with the West and - in particular for this article - the North Atlantic Treaty Organization.

Notes:
Comment associer la Russie à l'architecture de la sécurité européenne ? Si, durant toute la décennie 1990, cette question est restée en suspens, notamment en raison des tensions entre Moscou et l'OTAN et des reticences de l'UE à étendre le champ du dialogue au domaine sécuritaire, elle a pris un certain relief avec l'arrivée au pouvoir de V. Poutine et, plus encore, avec les événements du 11 septembre. Après avoir tenté de contenir l'influence de l'Alliance atlantique en proposant d'abord de faire de l'OSCE le pivot d'une sécurité paneuropéenne, puis en manifestant un intérêt croissant pour la construction de la Politique européenne de sécurité et de défense (PESD), la Russie a pris conscience qu'une attitude plus amène à l'égard de l'OTAN servirait mieux ses intérêts. De leur côté, les pays occidentaux s'accordent à la reconnaître, depuis les attentats contre les États-Unis, comme un partenaire majeur dans la prévention des nouvelles menaces pesant sur la planète. De nouveaux mécanismes de coopération ont été mis en place, comme des réunions mensuelles entre Moscou et l'UE et le 'Conseil à 20', OTAN-Russie. Même si la véritable portée de ces changements institutionnels suscite un certain scepticisme dans ce pays, il n'en reste pas moins qu'ils lui permettent de s'ancrer plus solidement dans le jeu de la sécurité européenne et, partant, sur la scène internationale.

Russia and NATO toward the Twenty-First Century: Conflicts and Peacekeeping in Bosnia-Herzegovina and Kosovo.

1. NATO--RUSSIA (FEDERATION)
2. KOSOVO (SERBIA)--HISTORY--CIVIL WAR, 1998-1999--RUSSIA (FEDERATION)
3. YUGOSLAV WAR, 1991-1995--RUSSIA (FEDERATION)

Notes:
The new Russian-NATO relationship plunged to the lowest point during NATO's 78 day Kosovo air campaign in Spring 1999. Despite the difficulties at the political level, the analysis suggests that Russia's participation in joint peacekeeping with US/NATO forces in Bosnia-Herzegovina (IFOR/SFOR) and Kosovo (KFOR) stand as perhaps the most encouraging aspect of the contemporary Russian-NATO relationship. These successes in peacekeeping tended to be overshadowed by the serious strains between Russia and NATO in developing a response to the implosion of Yugoslavia. While such practical cooperation between Russia and NATO can contribute to eroding the barriers of the past and to the development of a constructive relationship for the twenty-first century, these military-to-military accomplishments cannot shape broader Russian-NATO strategic priorities. The article concludes with examination of Moscow's post-mortem assessments on Kosovo and
evaluation of prospects for the future of the Russian-NATO relationship in the aftermath of the Yugoslav experience.

Notes:
The author analyses merits and drawbacks of the creation of the new NATO-Russia Council at the Rome Summit in May 2002 and compares new expectations of relations between Russia, NATO and the West with old illusions. He gives attention to the main features of the declaration as to peacekeeping, counter proliferation and a common approach to terrorism. Due to the powerful forces of revisionism in Russia both Putin and the West have to reckon with uncertainty and insecurity.

Relations between NATO and Russia have evolved through six distinct phases since December 1991. An initial 'honeymoon' in 1991-93 was followed by deterioration. This was temporarily arrested in 1996-97 by NATO upgrading its institutional links with Russia. The relationship was severely tested during the Kosovo crisis in early 1999. Relations were not severed, however, and a gradual rebuilding occurred from the summer of 1999. The impact of 11 September 2001, finally, has been limited. Since 1991, the development of NATO-Russia relations has been uneven. Overall objectives have not been identified by either side. Nevertheless, an underlying stability has become apparent in the relationship.

Notes:
En se rangeant aux cotes des Etats-Unis dans la lutte antiterroriste au lendemain des attentats du 11 septembre, le président Poutine a modifié la donne en ce qui concerne l'avenir de l'OTAN. Certes, le premier élargissement de l'Alliance, qui a accueilli la Pologne, la Hongrie et la République tchèque, avait eu un impact négatif sur les relations entre la Russie et l'Occident, ouvrant la voie à un désaccord profond, proche de la confrontation, a propos de la crise du Kosovo. Mais dans les deux cas, Moscou n'a pas eu gain de cause. Tirant les leçons de cet échec, la Russie, sans être favorable à la poursuite de l'élargissement de l'OTAN, a concentré ses efforts sur la candidature des trois États baltes. Poutine a voulu éviter que cette question n'affecte sa politique de rapprochement à l'Ouest, compensant la perspective d'une avancée de l'Alliance vers la Baltique par des succès politiques en Ukraine, en Moldavie et dans d'autres pays de la CEI. Mais, dans le nouveau contexte stratégique ouvert par le 11 septembre, l'enjeu pourrait bien être de faire de la Russie un véritable allié de l'Occident en achevant son intégration dans les structures de sécurité de l'après-guerre froide.

Notes:
In the rapidly changing arena of post-Wall geopolitics, NATO has proved to be the most dynamic actor, claiming for itself a significant role in regional security throughout Europe. Regardless of how one might judge NATO in terms of legitimacy, legality and international norms and laws, it has unmistakably overshadowed the OSCE, the UN and the EU in terms of its capacity for assertive action, as witnessed in the Balkans. However, this newly forefronted efficacy is at odds with the nascent post-Cold War security identity of the Russian Federation. Indeed, the new prominence of NATO only underscores its inadequacies as an anchoring-point for Western security architecture. The change in NATO's world prominence has even led to an impoverished awareness of the changing state of Russia. This article presents the new NATO-Russian security picture, analyses its dynamics and presents proposals for reform of the institutional structures concerned. It argues that NATO's ability to fulfil a regionwide security role is questionable under current arrangements. In particular, its exclusive membership policy not only leads to an explicit marginalizing of the Russian Federation, but also puts into question the Alliance's legitimacy as a regional security institution.

Notes:
This article examines the dual problem of Russia's international identity and its integration with the West, looking at it from first the Eastern then the Western side. It argues that a Westernist state identity would be sustainable for Russia only if accompanied by integration with the Euro-Atlantic institutions, and that in some respects the prospects for this are not as bad as usually thought: Russia is in fact in the process of entering most of the minor institutions of the Atlantic system. However, NATO and the EU are the decisive institutions, and here Russia has fared poorly. Neither side conceptualizes NATO in a way that would lead to Russian entry. NATO affirms that Russia is eligible to join when it meets the conditions, but few people on either side believe it: the conditions were conceptualized for including only small countries, not Russia. The inertia of mutual counter-position remains strong. Many in NATO circles have raised a series of objections to ever including Russia, ranging from a visceral belief that NATO needs to have Russia as its external enemy to a more specific fear of a Russian veto power; and NATO has yet to undertake to make its decision-making arrangements more flexible, as would be necessary in order to address the fear of vetoes. In theory the obstacles could be overcome in the present period; in practice this does not seem likely. Presently Russia is instead speaking mainly of uniting with the EU, yet this has even fewer prospects: the EU is too small to take in a large Russia. The failure to find a substantial Western institutional home for Russia has meant, and is likely to continue to mean, undermining the viability of the recurrent attempts at a Westernist identity for Russia.

Notes:
The promise of constructive NATO-Russia relations remains in jeopardy, prejudiced by friction over the alliance's expansion, its intervention in the Balkans, and Moscow's perception that its interests are being disregarded. On a host of issues, from stability in Europe to the maintenance of effective arms control regimes and management of regional crises beyond the Continent, cooperative working arrangements with Russia are vital. To assure such cooperation NATO should make clear that it is open to Russian membership, priority should go to EU expansion, and the US should pursue joint defenses with Russia.

Notes:
NATO's future is again the subject of speculation and debate despite its having fought a recent and apparently successful war in Kosovo. This article proposes that there are three aspects to this challenge. First, NATO is facing a series of dilemmas in its relations with non-members: how should it manage relations with Russia, and with the applicants for membership? The authors argue that NATO should seek to develop a consolidationist posture. The second challenge is that of developing an EU-NATO partnership in the light of the Helsinki Headline Goals. This, it is proposed, can be developed through a division of labour. The third task, that of military restructuring, is overshadowed by the complexities of processing a working European military structure. In conclusion, the authors suggest that a strategy for the alliance, a key component of the Cold War, but subsequently lost, can be refashioned from the above elements.

Focusing on relations between NATO and Russia surrounding the Alliance's decision to enlarge, this paper develops a theory of symbolic power that highlights the relationship between identities, narrative structures, institutions, and legitimate action in the construction of security policy. The authors demonstrate that such a theory provides a significant contribution to analysing the role of NATO in post-Cold War security, to understanding the evolution of NATO-Russia relations, to assessing the 'promise' of international institutions as a means of structuring security relations, as well as highlighting forms of power at work in the social construction of 'security communities'.

NATO's air campaign against Yugoslavia precipitated the most dangerous turn in Russian-Western relations since the early 1980s. Although tensions have eased since the end of the Kosovo war, the anger and suspicion engendered on the Russian side will not easily dissipate. The anger will endure not least because the Russian reaction had little to do with the Serb-Kosovar conflict itself, and much more to do with Russia's growing unease about NATO's post-Cold War transformation: its enlargement and pretensions to act beyond the territory of its members without an explicit UN mandate. Repairing relations will require political realism in Russia, the absence of a
major new crisis in Kosovo, and restraint from NATO.

Subject(s):

2. NATO--ENLARGEMENT

Notes:
The end of the cold war led to a new European order in which a new security agenda has emerged embracing issues wider than the old military perspectives. NATO has sought to respond to the new order by moving towards concepts of dialogue and cooperation with former opponents in the form of such programmes as Partnership for Peace. The countries of central and eastern Europe, however, have sought full NATO membership as a more concrete guarantee of future security. NATO enlargement became official NATO policy, justified by the idea of promoting stability in central and eastern Europe and as a reflection of NATO's new perception of itself within a post-cold war security architecture. Russian opposition to NATO enlargement has been motivated by fears of NATO exploitation of Russian weakness, loss of strategic positions to NATO and exclusion from Europe. The Founding Act on Mutual Relations was proposed by NATO to overcome Russian concerns and create a new partnership with Russia. Debate has continued within Russia about whether this has actually strengthened Russia's position in its dealings with the West. Fears remain about a further round of NATO expansion into the former Soviet Union which, it is said, would put an end to any existing partnership. Russia is not only redefining its own security agenda in the post-Soviet period but also defining its own broader identity and foreign-policy interests. Western policy makers should not always simply assume that Russia will continue to support a security architecture that primarily accords with the West's agenda.

Notes:
In 1999, the Atlantic Alliance asserted its absolute primacy in European security affairs, successfully reversing ethnic cleansing in Kosovo, admitting three new members from Central Europe and unveiling a New Strategic Doctrine. Yet the challenge of Russia's unremitting opposition to NATO remains. This situation is serious not so much because Russia can threaten Western interests directly, but because of the negative impact that continued confrontation with NATO has on Russia's domestic political evolution. For the West to construct a more cooperative and constructive political and security relationship with Russia, other organisations ought to assume greater prominence - most notably the European Union, but also the UN and the Organisation for Security and Cooperation in Europe. It is also the UN and the West's nor in Russia's interests for NATO to enlarge further eastwards.

Notes:
Dialogue has become a central feature of post-Cold War NATO discourse as well as a concept for theoretical exploration in International Relations. This article explores the role of NATO's dialogue with its former adversaries in constructing post-Cold War security relations in Europe. The theoretical argument builds on two concepts : a 'language of manoeuvre', as used by Hollis and Smith, and the Wittgensteinian notion of being 'entangled' in our language. These insights are applied to an analysis of interactions between NATO, Russia, and the Central Eastern European countries over a six-year period. While accepting that NATO may have had an instrumental goal in encouraging dialogue, once engaged in the process, Alliance manoeuvres, including the decision to expand, were circumscribed and shaped at any given point in time by its entanglement in conflicting promises to others.

Notes:
Russia's signature to the Founding Act, which paved the way for NATO expansion, was accompanied by continuing misgivings about Western intentions. Russia, which for decades had pursued the idea of a pan-European security organisation, continues to view NATO expansion as unnecessary and seeks instead to strengthen the OSCE. Reinforcing stability and democracy within its new member states is one of the motivations for NATO expansion, but it is the OSCE which is better designed to encourage stability in these particular states. NATO continues to be seen by Russia as a military organisation, and its expansion may have damaging consequences for future Russian-Western relations.

Notes:
Equivocation by Western governments about the place of Russia in Europe in the context of the enlargement of NATO and the EU leaves a critical issue unresolved. In effect, Russia has been excluded from the Euro-American ambit. Russia's present weakness has enabled its own reservations about these developments to be sidelined; but an economically rejuvenated Russia could pose a threat of dominance in eastern and central Europe every bit as substantial as the military dominance of former times. A way needs to be found to incorporate Russia into a modified European system to avoid its retreating into a potentially dangerous isolation.

The article compares the results of two model analyses on the implications of NATO enlargement for Russia's security in six regions: North-West, West, South-West, Caucasus, Central Asia, and Far-East. One was done by Vitali Tsygichko using his 'Modes of Defense Sufficiency' (MDS), the other one by these authors using Tsygichko's data as input to the 'Generalized Force Ratio Model' (GEFRAM). While agreeing with regard to the general trend in the development of Russia's security situation, the results differ significantly as to whether these trends indicate a reduction of security below Russia's stated requirements. The results are preliminary and meant as an input to a continued debate on the subject among analysts.

The NATO-Russian Relationship One Year After: Next Steps After First Enlargement?

Author(s):
1. Isakova, Irina

Subject(s):
1. NATO--RUSSIA (FEDERATION)
2. NATO--ENLARGEMENT

Notes:
Relations between Russia and NATO have been normalised since the signing of the Founding Act between NATO-Russia last year. This
opened the way for a permanent Russian mission to NATO, the posting of a military Russian delegation to NATO and a NATO information centre has opened in Moscow. This comes at the same time as NATO is expanding to include some of the states of the former Warsaw Pact. Here, the author looks at how the Russia–NATO relationship can develop in the coming months and years. Although a rapprochement has taken place between the two, their aspirations still differ substantially: while NATO is set on a process of enlargement, the Russians still hope to either persuade NATO to reconsider its 'open door' policy or to stretch the principle to include Russia as well. It is clearly a difficult stage which the relationship has entered. Dr. Isakova argues that the best way forward is to build on existing security arrangements and, if possible, to prolong the period between the first and second waves of enlargement.

Notes:
In his reply to Jonathan Haslam's article published in the January 1998 issue of this review, the author outlines his vision of NATO and its origins and purpose, and discusses the American strategic view of the post–Cold War world against which the decision to expand NATO should be seen. Russia will, he maintains, remain a problem for the West, but its importance and power should not be overemphasized. The danger facing the Western security order is not one of Russia's exclusion but of US power ebbing out of Europe - a distinct probability unless NATO expands.

L'Acte fondateur entre l'OTAN et la Russie, signé à Paris le 27 mai 1997 est le texte le plus symbolique de la fin de la guerre froide. L'avenir dira la portée réelle de cet accord pour la sécurité de l'Europe. Elle dépendra à la fois de la volonté occidentale de tirer parti des consultations et des coopérations qu'il prévoit et de la perception que la Russie se fait de ses intérêts de sécurité au prochain siècle. Moscou cherchera probablement tout à la fois à coopérer avec l'Ouest et à transformer l'OTAN en une organisation de sécurité collective de type OSCE. Tels ne sont pas les objectifs des membres de l'OTAN. C'est pourquoi l'ouverture à la Russie doit se faire avec autant de discernement que de détermination, surtout au moment où le désarmement marque le pas à la Douma.

Dans le même temps, le gouvernement russe, favorisant la participation et la coopération dans ses relations avec l'Ocident, reévaluant sensiblement ses rapports avec ses anciens satellites, semble signifier qu'il n'envisage pas pour son pays un destin coupé de l'Europe. En étendant leur espace stratégique sans considération demeuree pour la fragilité des équilibres internes en Russie, les Occidentaux ne risquent-ils pas de voir resurgir la logique de confrontation ?

In Russia there is very little sympathy for NATO's eastward enlargement. Everybody is against it and considers it as a threat to Russia. But there are very diverse views about the questions how big such a threat really is and of what it consists, what consequences it could have for Russia and how Moscow should react to NATO's eastward enlargement. All political forces, the general public, the military experts and the political scientists intensively discuss this subject and seek a constructive solution, also taking the ideas of a strategic partnership with NATO into consideration. What would be useful for Russia and what would better serve the national interests? As to this, there are completely opposing opinions: an extension of NATO to the East would be a threat or would not be a threat at all; Russia would have to react absolutely strongly to this or, on the contrary, would not have to react at all; Moscow's relations to NATO should be suspended or Russia should request NATO membership.

On 27 May 1997, the heads of state and government leaders of the sixteen NATO members and the Russian president Boris Yeltsin signed in Paris the Founding Act on Mutual Relations, Cooperation and Security between the Russian Federation and the North Atlantic Treaty Organisation - NATO-Russia Founding Act for short. Even in the Nineties, during which there has certainly been no lack of historic events, the ceremony at the Elysee can claim special significance, since it puts the relationship between the two main antagonists of past decades on a promising contractual foundation. To a certain extent, this document has also finally put an end to the Cold War, eight years after the fall of the Berlin Wall. However, unlike the Ukraine, which formulated a parallel joint document with NATO (whose designation 'Charter' gives it a slightly lower status in terms of protocol), Russia demonstrates marked restraint with respect to the cooperative possibilities of the relationship of association the Act has formally established. In this article the author examines the political implications and intentions associated with the NATO-Russia Founding Act.

Subject(s): 1. NATO--RUSSIA (FEDERATION) 2. NATO--ENLARGEMENT
Notes: At its July 1997 summit meeting, NATO plans to invite several countries to begin negotiations leading to their membership within a few years. To enlarge the Alliance without a parallel improvement in NATO-Russian relations could lead to a major and unnecessary deterioration in West-East relations. It could empower anti-Western and nationalist elements in Russia; provoke a retrograde Russian defence policy, including emphasis on tactical and strategic nuclear weapons; cause Moscow to feel un constrained by the Conventional Armed Forces in Europe (CFE) Treaty; and kill the Strategic Arms Reduction Talks (START) II Treaty. It would be preferable to engage Moscow in a serious and substantive NATO-Russian charter - a package of measures including institutionalised political consultations, modernisation of the CFE Treaty, formal reassurances concerning the non-deployment of nuclear weapons and foreign forces in new NATO member-states, enhanced Russian participation in Partnership for Peace (PfP), and a coordinated response to the Baltic States. The engagement of Russia would make enlargement politically acceptable.

Pour lui, l'opposition officielle russe a été plus rhétorique que reelle. Moscou s'est
efforcee d'effectuer une pression sur les Occidentaux en vue d'obtenir des compensations lors des negociations. Or, les garanties occidentales inclues dans l'Acte fondateur semblent bien floues et, en tout cas, bien eloignées du souhait russe de voir se constituer un systeme de securite collective europeen autour de l'OSCE et en dehors de la 'tutelle' americaine.

The author blames the present objections of Russia to NATO enlargement on the delay in Western decision-making after the end of the Cold War. He prefers gradual enlargement, doing justice to the wish of the Central Europeans to become integrated militarily, to a division of Europe in spheres of influence. While it is not advisable to exclude Russia from NATO membership, the envisaged Charter between Moscow and the Alliance should not be allowed to undermine the political and military effectiveness of the West.

The results of the December 1993 legislative elections in Russia and the January 1994 NATO summit marked a turning point in Moscow's attitude vis-a-vis the Atlantic Alliance. The main point of contention was of course NATO's decision to enlarge. From Russia's point of view, the expansion of NATO will divide Europe, goes against the principle of joint security, and increases instability. Despite the signature of a bilateral charter with Russia, the debate will be kept alive.
