PRESS RELEASE M/DPC/2(71)17

FOR IMMEDIATE RELEASE
8th December, 1971

DEFENCE EXPENDITURES OF NATO COUNTRIES

1949 - 1971

The figures given in the attached table represent payments actually made or to be made during the course of the calendar year. They are based on the NATO definition of defence expenditures. In view of the differences between this and national definitions, the figures shown may diverge considerably from those which are quoted by national authorities or given in national budgets.

The figures relating to the United States and Canada include expenditures for military aid programmes. The figures shown for European NATO countries do not include the value of end-items received under military aid programmes from the United States and Canada.

TOTAL DEFENCE EXPENDITURES OF NATO COUNTRIES
(Current Prices)

- a. Before it acceded to the North Atlantic Treaty Organization (May 1955), the Federal Republic of Germany contributed to the defence budgets of certain NATO countries by the payment of occupation costs ; moreover, it bore certain other costs which also fall within the NATO definition of defence expenditures. In addition to defence expenditures (NATO definition), the German authorities are obliged to incur large annual expenditures for Berlin owing to the exceptional situation of this city and the need, in the interests of the defence of the free world, to ensure its viability. These expenditures, which are not included in the figures given above since they do not come within the NATO definition, are forecast to be 3,876 million DM in 1971.
- b. The totals for Europe and for NATO do not include defence expenditures of the Federal Republic of Germany for 1949 and for this reason they are not directly comparable to the totals for the following years. Moreover, as these totals have been established on the basis of the official exchange rates in force, comparisons made between two successive years could be slightly distorted if one or more countries modified their exchange rates during the course of one of these years.
- c. Since August 1971 a certain number of countries have floated their currencies and their exchange rates are consequently subject to fluctuation. For purposes of comparison, it has been judged preferable to continue to use the official exchange rates for 1970 in converting 1971 data into US dollars.
